VISHNUPRIYA B

B.E. Electronics and Communication Engineering.

Salem, Tamil Nadu

Contact : 8870490971
Email : bmvpriya7@gmail.com
DOB : 06.12.2005

OBJECTIVE

To obtain an entry-level position in core electronics or embedded systems where I can apply my foundational knowledge, develop practical skills through real-world exposure, and contribute effectively to the organization with a strong learning attitude and good communication skills.

SKILLS

- Programming: C (Basics), Python (Basics)
- Core Subjects: Digital Electronics, Analog Circuits, Communication Systems
- Embedded Systems: Fundamentals of microcontrollers and sensor interfacing
- Tools & Software: MATLAB, TinkerCAD,Magic vlsi Basic circuit analysis and simulation
- Soft skills: Good communication, leadership and Time management

TRAINING AND COURSES

NCC 'C' Certificate - **'A 'grade**

Embedded Systems Basics - **Online Course (Udemy ongoing)**

Python Programming Basics - **Online Course**

Intern training on VLSI - **Ematix Embedded and software solutions**

INTERESTS

- Industrial Safety and Automation Systems
- Energy Harvesting and Sensor-Based Applications
- Interested in practical implementation of electronics in defence systems, aviation technologies, and guided weapon systems.

ACTIVITIES

Organized and participated in blood donation camps
Actively involved in tree plantation drives
Participated in social service and community outreach programs

LANGUAGE

- Tamil
- English

EDUCATION

Government College of Engineering Salem

B.E Electronics and Communication Engineering

Passing Year - **2023-2027**

Grades : **8.46 (upto 6th semester)**

St.Anne's matriculation higher secondary school -kumbakonam

Higher secondary certificate -

Passing Year - **2022-2023**

Grades : **94%**

St.Anne's matriculation higher secondary school -kumbakonam

secondary school leaving certificate -

Passing Year - **2020-2021**

Grades : **100%**

PROJECTS

AI-Based Online Shopping Assistant – Shopwayo

• Developed an AI-based online shopping application to help users find and compare products efficiently.
• Designed the system to provide smart product recommendations based on user preferences and search behavior.
• Implemented features for price comparison, product analysis, and simplified online shopping experience.
• Gained understanding of AI-based recommendation systems, user interface design, and e-commerce application development.

piezoelectric energy generator

• Designed a system to generate electrical energy using piezoelectric sensors from mechanical vibrations.
• Studied the working principle of piezoelectric materials and energy harvesting techniques.
• Analyzed voltage generation and basic power utilization concepts.
• Improved understanding of renewable energy systems and practical electronics applications.

ACHIEVEMENTS

Gold Medalist – All India Vayu Sainik Camp (NCC)-2024

Active participation in college-level technical symposiums-Smart India Hackathon -17th sep 2025

Participated in technical hackathons and team-based problem-solving events

Recognized for discipline, leadership, and teamwork through NCC activities
