VINOTHINI M

ELECTRONICS AND COMMUNICTION ENGINEERING STUDENT

vinothinim47@gmail.com +91 88706 29801 LinkedIn

CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student with a strong foundation in electronics, communication, embedded systems, and programming. Seeking an entry-level engineering opportunity to apply technical knowledge, problem-solving skills, and practical experience in real-world engineering applications.

EDUCATION

B.E – Electronics and Communication Engineering 2023 – 2027
Government College of Engineering Salem
CGPA – 8.653

HSC 2022 – 2023
AKV Matric Higher Secondary School
95.66%

SSLC 2020 – 2021
AKV Matric Higher Secondary School
100%

TECHNICAL SKILLS

Programming Languages
C++, C (Core basics)

Software Tools
MATLAB (Simulation and Analysis)

Core Engineering
Digital Electronics, Microprocessors, Communication Theory

WORKSHOPS & TRAINING

Electronic Measuring Instruments
Hands-on training in hardware testing and measurement.

Embedded Systems & IoT
Attended workshops focusing on the integration of hardware with software basics.

HCL GUVI – AI & Generative AI Training | 15 Days
- Learned AI & Generative AI fundamentals.
- Hands-on with Gemini, Suno AI, Lovable & ElevenLabs.
- Gained skills in prompt engineering and AI-assisted development.

AI/ML Engineer Intern internship at Ocean Pulse Health, Salem 16/04/2026 – 16/05/2026
- Developed an AI-powered research assistant for academic paper research and study purposes.
- Built a conversational chatbot that helps users interact with and understand research papers.
- Worked with AI, NLP, and information retrieval concepts.

PROJECTS

Tax Management System
Developed a Tax Management System using Java (Swing) to calculate income and taxes from user input. Integrated JDBC with MySQL to store data and applied OOP concepts for clean design.

AI-Based Adaptive Modulation and Coding | Mini Project
Utilizing MATLAB to simulate wireless communication environments. Studying and implementing algorithms to improve data transmission reliability.
Focusing on the mathematical and logical aspects of signal efficiency.
