PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering undergraduate with skills in Python, SQL, JavaScript, AI/ML, and Software Development. Experienced in developing AI-powered applications, analytics platforms, and automation solutions using Python, Flask, and modern development tools. Completed multiple internships and industry projects with hands-on exposure to software development and problem solving. Seeking Software Engineering, Python Developer, AI/ML, and Product Engineering internship opportunities.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Web Development: HTML, CSS, JavaScript, Flask, REST APIs

Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, Computer Vision, Data Analytics, Predictive Modeling

Databases: MySQL, Firebase, Supabase

Developer Tools: Git, GitHub, VS Code, Postman

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-Learn, Flask

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Problem Solving

Additional Skills: API Integration, Debugging, Version Control, Software Testing, Technical Documentation

PROJECTS

Questlin.AI | ***Python, AI, Flask*** GitHub

- Developed an AI-powered learning assistant platform designed to support personalized learning and intelligent content discovery.
- Implemented AI-driven features and backend workflows to enhance user engagement and learning efficiency.

AI Plant Disease Detection System | ***Python, Machine Learning, Computer Vision*** GitHub

- Built an AI-based crop disease detection system using image processing and machine learning techniques.
- Implemented classification workflows for early disease identification and agricultural decision support.

Smart Hostel Analyzer | ***Python, Analytics*** GitHub

- Designed a hostel analytics platform for monitoring occupancy, operational metrics, and resource utilization.
- Generated analytical reports and insights to support data-driven management decisions.

MTI Filtering and Analysis Platform | ***Python, Data Analytics*** GitHub

- Developed a data filtering and preprocessing platform for improving dataset quality and usability.
- Implemented analytical workflows for extracting meaningful insights from structured datasets.

Canteen Management System | ***Python, Database Management*** GitHub

- Developed a software solution for managing food ordering, inventory tracking, and administrative operations.
- Integrated database-driven workflows to improve operational efficiency and record management.

EXPERIENCE

NXRA Insights Pvt. Ltd. 2025 – Present
Software Engineering Intern On-Site

- Contributing to software development projects using modern development tools and engineering practices.
- Supporting application development, testing, and deployment activities in a startup environment.

SAIL - Steel Authority of India Limited Feb 2026 – May 2026
Project Intern - Canteen Management System On-Site

- Developed and enhanced software modules for digital canteen management operations.
- Collaborated with stakeholders to understand requirements and deliver software-based solutions.

OctaNet Services Pvt. Ltd. May 2024 – Jun 2024
Python Developer Intern Remote

- Developed Python-based solutions and gained practical exposure to software development workflows.
- Worked on implementation, debugging, and optimization of application features.

Maincraft Technologies 2 Weeks
Virtual Intern Remote

- Completed internship activities focused on software development and technical implementation.
- Gained practical exposure to industry-oriented development workflows.

Enthutech 2 Weeks
Virtual Intern Remote

- Worked on assigned technical tasks and software development activities.
- Strengthened programming and problem-solving skills through guided projects.

EDUCATION

Excel Engineering College (Autonomous) 2023 – 2027
B.E in Electronics And Communication | CGPA: 8.8 Final Year Student (2026–2027)

Sri Chaitanya Techno School 2021 – 2023
Higher Secondary Certificate (HSC) | 70% Hosur

Sri Chaitanya Techno School 2020 – 2021
Secondary School Leaving Certificate (SSLC) | 90% Hosur

ACHIEVEMENTS CERTIFICATIONS

- Ethical Hacking Hackathon Participant - NIT Trichy
- IEEE Xtreme Participant
- OpenHack Participant
- IIT Madras Online Hackathon Participant
- Workshop Participant - Internet of Things (IoT)
- Workshop Participant - PCB Design
- Successfully completed industry project at SAIL
- Participated in Technical Idea Presentation Events
- Built multiple AI, Analytics, and Software Development projects
- Actively practicing Data Structures and Algorithms for Software Engineering interviews
- Certificates and supporting documents: View All Certificates
