PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate (CGPA 8.41/10, no active backlogs) with three internships in Python full-stack development, web development and C programming. Working knowledge of the software development life cycle (SDLC), Agile/Scrum, Python, SQL databases, REST APIs and software testing. Detail-oriented, collaborative and quick to learn; seeking an entry-level role in software or technology where I can contribute and grow.

EDUCATION

B.E. Electronics and Communication Engineering **2022 - 2026**
Adhiyamaan College of Engineering, Anna University | CGPA: 8.41/10 | No active backlogs

HSC **2021 - 2022**
KSR Matriculation Higher Secondary School, Tiruchengode | 81%

TECHNICAL SKILLS

Programming Languages: Python, C, SQL
Databases: MySQL, PostgreSQL
Software Development / SDLC: Software Development Life Cycle (SDLC), Agile/Scrum, Git, GitHub, Object-Oriented Programming
Software Testing: Postman (API testing), Debugging
Full Stack Development: Django, Django REST Framework, REST APIs, React.js, HTML5, CSS3, JavaScript
Cloud & Security: GitHub Actions (CI/CD), JWT, Google OAuth
AI / Emerging Technologies: Generative AI (Claude API), IoT (ESP32, Arduino)

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern **Mar 2026 - Jun 2026**
SourceSys, Chennai
- Developed and maintained full-stack application features using Python and modern frontend technologies.
- Integrated REST APIs between frontend and backend components and debugged issues across the stack.

Web Development Intern **Apr 2025 - May 2025**
CodeTech IT Solutions, Hyderabad
- Built responsive web pages using HTML, CSS and JavaScript and resolved cross-browser compatibility issues.
- Debugged front-end defects and collaborated with designers and backend developers.

C Programming Intern **Apr 2023 - May 2023**
Pentasoftware, Tiruchengode
- Practised C fundamentals including data structures, debugging and logic building.

PROJECTS

AI-Augmented Task Manager | Django REST Framework, PostgreSQL, Claude API, Ollama (Llama 3.1)
- Full-stack task management application with LLM function-calling (tool use) for AI-assisted task operations.

Task Manager Web Application | Django REST Framework, PostgreSQL, JWT, Google OAuth
- Deployed full-stack application with secure JWT and Google OAuth authentication; resolved OAuth and environment configuration issues in production.

Multi-Tenant SaaS Admin Dashboard | React, Chart.js, Tailwind CSS
- Built an admin dashboard with data visualizations for business analytics, deployed on Vercel.

BizInsight Analytics Dashboard | HTML, CSS, JavaScript, Chart.js
- Developed an interactive business analytics dashboard presenting data through charts and reports.

IoT Air Quality Monitoring System | ESP32, Arduino, Blynk
- Built a real-time air quality monitoring system with sensor data displayed on the Blynk IoT platform.

CERTIFICATIONS

SQL for Data Analysis - Simplilearn (2026) | Power BI for Beginners - Microsoft (2026) | Introduction to MS Excel - Microsoft | Full Stack Development - NoviTech (2026) | Full Stack Development - Wipro TalentNext (2025) | AI & Data Analytics - NoviTech (2025) | AI Fundamentals - IBM SkillsBuild (2025) | Cisco Networking Basics (2024)

ACHIEVEMENTS & LANGUAGES

- Paper Presentations: KALAM 2023 (Inter-College Science Fest), Karpagam College of Engineering; Technical Symposium Celebrate '23, Sri Shanmugha College of Engineering and Technology.

Languages: Tamil, English
