PROFESSIONAL SUMMARY

Software Engineering-focused with experience building software projects and solving real-world problems. Strong foundation in programming, problem-solving, and software development. Seeking a Software Engineer role to apply and grow these skills.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science - 2023 - 2027

M Kumarasamy College of Engineering, Karur

CGPA: 7.74

TECHNICAL SKILLS

- Programming Languages: Java, Python, SQL
- Tools & Platforms: ServiceNow, Git/GitHub

PROJECTS

Local Community Service Provider Using Machine Learning

Full-Stack Web Application | Flask, React

- Designed and developed a full-stack web application using Flask (backend) and React (frontend) to recommend local service providers to users based on their requirements.
- Implemented a Random Forest classification model to improve the accuracy and relevance of service provider recommendations.
- Applied sentiment analysis on user reviews and feedback to enhance provider reliability scoring and overall recommendation quality.
- Collaborated on end-to-end development, covering data processing, model integration, and user interface design.

Behavior-Aware Acoustic Biogas Monitoring (BioInsight)

IoT-Based Mobile Application | ESP32, Flutter, Firebase

- Co-developed BioInsight, a real-time mobile monitoring app that tracks biogas digester health using acoustic, vibration, temperature, pressure, and slurry-level sensor data.
- Developed an ESP32-based sensor system with Firebase for real-time monitoring, dashboards, and threshold-based alerts for abnormal conditions.
- Performed unit, functional, acceptance, and validation testing across the complete sensor-to-cloud-to-app pipeline.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- ServiceNow Certified Application Developer(CAD)
- IBMCEP : Business Intelligence (BI)

ACHIEVEMENTS

- Research paper titled *"Local Community Service Provider Using Machine Learning"* accepted for Oral Presentation at the IEEE-sponsored International Conference on Automation, Computing and Renewable Systems (ICACRS 2025).
- Top Winning Team, IBM Expert Labs National Hackathon 2026 — Recognized for innovation, technical problem-solving, and collaborative development
