YASVAND A K

Artificial Intelligence & Data Science Student

7904715141 yasvandak@gmail.com github.com/yasvandak linkedin.com/in/yasvandak

EDUCATION

KONGUNADU COLLEGE OF ENGG. & TECH.

B.Tech, AI & Data Science
2023 -- 2027
Trichy, TN

ANANDA VIDYALAYA MATRIC. HSS

Namakkal, TN
12th Standard (HSC) – 2023
10th Standard (SSLC) – 2020

SKILLS

- Java
- Python
- SQL
- Power BI

ACHIEVEMENTS

- **First Prize** – AI-Powered Plant Identification and Disease Classification System
- **Second Prize** – Visual Drawing and Hand Tracking System
- Hackathon Participant – VIT Chennai
- Hackathon Participant – SMVEC Pondicherry

CERTIFICATIONS

- NPTEL – Internet of Things
- MongoDB – MongoDB Basics
- NVIDIA – Fundamentals of DL
- Java Programming
- ML with AI Applications

LANGUAGES

- English
- Tamil
- Japanese (N5)

SUMMARY

AI & Data Science undergraduate with hands-on experience developing machine learning and computer vision applications. Passionate about building practical AI solutions and continuously improving through real-world projects, hackathons, and collaborative development.

EXPERIENCE

EAGLE HI-TECH SOFTCLOU PVT LTD. | AI Intern
June 2025 | Chennai, TN

- Gained hands-on experience developing and evaluating AI solutions in a professional software environment, working alongside experienced engineers as part of the core AI team.
- Collaborated with engineers to preprocess datasets, evaluate AI models, and validate model performance throughout each stage of the development lifecycle.
- Documented internal workflows and supported project demonstrations, strengthening practical understanding of end-to-end AI pipelines.

PROJECTS

AI-POWERED AREA SURVEILLANCE SYSTEM FOR THEFT DETECTION | Team Leader

- Identified the core problem of ineffective manual surveillance systems that consistently failed to detect suspicious activity in security-critical spaces.
- Built an AI-powered surveillance system using Computer Vision and Machine Learning to detect suspicious activity from live video streams in real time.
- Led a team of developers, coordinated project planning, monitored progress, and ensured timely completion of all major project milestones.

AI-POWERED PLANT IDENTIFICATION AND DISEASE CLASSIFICATION SYSTEM | Front-End Developer

- Identified the widespread problem of delayed and inaccurate plant disease detection caused by dependency on manual inspection and limited access to expert knowledge.
- Engineered an image classification system using Machine Learning and Image Processing for automatic plant species identification and disease classification.
- Designed and implemented the front-end interface, integrating real-time image input, live result display, and intuitive navigation for end users.
