Professional Summary

Data Analyst with a B.Tech in Computer Science (IIIT Kottayam) and a PG Diploma in Data Science (IIIT Delhi), specializing in Advanced Excel-driven analysis, ETL, and KPI reporting. Built dashboards and automated workflows that improved data accuracy to 98%+ and cut processing time by 30%, translating raw operational data into actionable business insights. Working knowledge of SQL, Python, and Power BI. Seeking Data Analyst / Business Intelligence roles where analytical rigor drives decision-making.

Experience

- **Operations Associate** November 2025 - Present
  Indo International Christian Chamber of Commerce (IICCC), Chennai
  - Extracted, cleaned, and transformed large-scale national and international datasets from disparate sources using Advanced Excel (Power Query, XLOOKUP, INDEX/MATCH), building repeatable ETL workflows that ensured data consistency across multi-region records.
  - Performed systematic data audits, deduplication, and validation checks across member and institutional databases, sustaining 98%+ data accuracy and zero-discrepancy compliance across core repositories.
  - Analyzed operational datasets using Pivot Tables, Data Validation, and conditional formulas to surface trends, building dynamic Excel dashboards and KPI tracking models that translated raw data into structured analytical summaries and performance reports for senior leadership.
  - Automated recurring data-entry and reporting workflows using Advanced Excel functions, cutting data processing time by 30% and reducing manual errors.

- **Data Analyst Intern** May 2025 - October 2025
  Scihub Semiconductor Solutions Pvt Ltd.
  - Collected, cleaned, and transformed engineering-college datasets (contact details, websites, course offerings) using Advanced Excel, ensuring accuracy across multiple institutional sources.
  - Built an interactive Power BI dashboard to surface course-enrollment trends, giving stakeholders visibility into engagement patterns and supporting data-driven planning decisions.

Key Skills

- **Programming & Analytics**: Python (Pandas, NumPy), SQL, MySQL, Matplotlib, Seaborn
- **BI & Visualization**: Power BI, Advanced Excel (XLOOKUP, VLOOKUP, Pivot Tables, Power Query)
- **Analytical Techniques**: Data Wrangling, Regression, Hypothesis Testing, Predictive Analytics
- **Core Strengths**: Data Cleaning & Validation, Process Improvement, Stakeholder Reporting

Education

- **Indraprastha Institute of Information Technology Delhi** Delhi, India
  PG Diploma - Data Science in Health and Climate change for Social impact *2024 - 2025*
- **Indian Institute of Information technology Kottayam** Kerala, India
  Bachelor of Technology - Computer Science and Engineering *2020 - 2024*

Projects

- **NLP-Based Depression Prediction from Social Media(Academic Project)**:
  - Built a hybrid ML/DL pipeline (SVM, Logistic Regression, BERT, LSTM, GRU) to detect depression signals from Reddit posts, reaching 94% accuracy after hyperparameter tuning.
  - Deployed an end-to-end prototype (Flask, Node.js) with LIME-based explainability for transparent, real-time predictions.
- **SQL-Based Retail Analysis (Digital Music Store Dataset)**:
  - Analyzed customer behavior using SQL to inform strategic planning; findings drove targeted campaigns resulting in a 20% sales increase.
- **Python Trend Analysis (Spotify Dataset)**:
  - Used Python (Pandas, NumPy, Matplotlib, Seaborn) to identify music-consumption patterns, informing recommendation strategies that improved engagement by 25%.

Achievements and Courses

- **Applied Data Science Lab** : WorldQuant University
- **Python Crash Course** : Google (Coursera)
- **SQL for Data Science** : IBM (Coursera)
- **Data Analytics** : Accenture (Forage)
- **Power BI Data Visualization** : Great Learning Academy

Leadership & Volunteer Experience

- **Team Lead, Dance Club** : led cultural workshops and events, coordinating a 10+ member team.
- **Event Organizer at Apoorv 2023**: directed event logistics for 10+ team members, raising attendee satisfaction by 20%.
