PROFESSIONAL SUMMARY

IT undergraduate who builds full-stack web applications end to end — from React front ends to Node/Express APIs and MySQL/MongoDB data layers. Comfortable working across the stack on real projects: an AI-powered code review tool, an online exam platform with live proctoring, and a trip-planning app used across devices. Looking for a full stack developer role where I can keep shipping features that people actually use.

PROJECTS

Smart Trip Management System — HTML, CSS, JavaScript, React.js

- Built a responsive trip-planning app covering scheduling, expense tracking, and destination browsing in one interface.
- Designed and implemented the trip-planning, saved-trips, and destination-browsing pages with a consistent, user-friendly layout.
- Structured the UI to work cleanly across desktop and mobile screen sizes.

AI Technical Debt Analyzer — React.js, Node.js, Express.js, MongoDB, JWT, Gemini AI API, ESLint

- Built a full-stack tool that scans GitHub repositories and flags code quality, security, and maintainability issues automatically.
- Integrated the Gemini AI API to explain flagged issues in plain language and suggest optimized, refactored code.
- Built an interactive dashboard that scores technical debt per repo and surfaces issue reports for developers to act on.

Online Exam Management System — Java, React.js, HTML, CSS, JavaScript, MySQL

- Developed a full CRUD exam platform with secure authentication for creating, running, and grading online exams.
- Added AI proctoring to monitor live exam sessions and flag suspicious activity in real time.
- Built an AI answer-explanation feature that gives students a detailed breakdown of each question after submission.
- Designed an AI-driven performance analysis module that generates a personalized learning plan per student.

INTERNSHIP

Frontend Development Intern

- Built responsive, user-facing web pages with HTML, CSS, and JavaScript for a live product.
- Reworked page layouts to hold up consistently across screen sizes, applying responsive design principles throughout.
- Created reusable UI components adopted across multiple pages, cutting duplicate markup and speeding up future page builds.
- Worked directly with team feedback to iterate on layout and usability rather than working in isolation.

Web Development Intern

- Designed and built responsive, user-friendly web pages using HTML, CSS, and JavaScript.
- Added interactive features and reusable components that made the site easier to use and maintain.
- Fine-tuned layouts so pages held up reliably across different devices and screen sizes.
- Picked up solid debugging and testing habits along the way, which kept the code efficient and production-ready.

TECHNICAL SKILLS

Languages: Java, JavaScript

Web: HTML, CSS, React.js, Responsive Design

Backend / Data: Node.js, Express.js, MySQL, MongoDB

Core CS: Object-Oriented Programming, Data Structures & Algorithms, CRUD design

Tools: Git, GitHub, VS Code, ESLint

EDUCATION

B.Tech, Information Technology | Nandha Engineering College | 2023 – 2027 | CGPA: 8.5

CERTIFICATIONS & LANGUAGES

- NPTEL — Privacy and Security in Online Social Media (2024)
- NPTEL — AI in Human Resource Management, Elite (2026)

Languages: English, Tamil
