NELLORE MOKSHITHA

Nellore, Andhra Pradesh, India | +91 9550974347 | mokshithanellore4347@gmail.com | github.com/mokshitha-01

PROFESSIONAL SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence & Data Science, with hands-on experience building machine learning models for text and image classification and predictive analytics. Skilled in Python, Java, and C++, with a solid foundation in machine learning fundamentals gained through academic projects and internships in web development and Python programming. Proven ability to quickly learn new tools and frameworks, debug complex problems, and deliver working solutions independently and in teams. Seeking an entry-level role as an AI Engineer, Data Scientist, Machine Learning Engineer, Python Developer, or Software Engineer to apply strong analytical and programming skills to real-world challenges.

TECHNICAL SKILLS

Programming Languages: Python,C++,Basics in C#
Core Concepts: Machine Learning Fundamentals, Data Preprocessing, Text & Image Classification, Predictive Modeling
Tools & Platforms: Visual Studio Code, Microsoft Excel,Github
Other Skills: Debugging & Troubleshooting, Responsive Web Design Basics, Automation Scripting, Problem-Solving

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence & Data Science *Expected 2027*
Vivekanandha College of Technology for Women | CGPA: 8.1 / 10

Higher Secondary Education (Intermediate)
Rathnam Junior College | 73%

ACADEMIC PROJECTS

Email Spam Classifier *Python, Machine Learning*

- Engineered a supervised machine learning model to classify emails as spam or legitimate, working with a labeled dataset of thousands of email samples.
- Cleaned and preprocessed raw email text by removing stop words, punctuation, and HTML tags, then applied tokenization to prepare data for feature extraction.

Skin Disease Classification from Images *Python, Image Classification*

- Designed and trained an image classification model to identify skin diseases from dermatological image data using deep learning techniques.
- Preprocessed the image dataset by resizing, normalizing pixel values, and applying data augmentation (rotation, flipping, zoom) to improve model generalization.

Sleep Quality Predictor *Python, Predictive Modeling*

- Developed a predictive model to estimate sleep quality using a health and lifestyle dataset containing variables such as sleep duration, stress level, physical activity, and screen time.
- Performed end-to-end data preprocessing, including handling missing values, encoding categorical variables, and scaling numerical features for model readines.

INTERNSHIP EXPERIENCE

Python Intern — Cybernaut Edutech Pvt. Ltd.

- Completed hands-on Python programming assignments, strengthening core programming logic and syntax proficiency.
- Enhanced debugging and automation skills by identifying and resolving code-level issues independently.

Web Development Intern — CodeBind Technologies

- Learned foundational web development concepts, including responsive web design principles.
- Built basic web applications, gaining practical exposure to front-end development workflows.

CERTIFICATIONS

- Python Programming
- Java Programming
- C++ Programming
- Attended Workshop on UI & UX Design

ACHIEVEMENTS

- Earned multiple HackerRank programming badges for consistent problem-solving in Python, Java, and C++.
