KIRUTHIKA RAJA

Salem, Tamil Nadu, India | +91-8103495050 | kiruthikarajanithya@gmail.com
Linkedin : linkedin.com/in/kiruthika-raja-b676a0357 | GitHub : github.com/kiruthikaraja26

PROFESSIONAL SUMMARY

Final-year B. Tech student in Artificial Intelligence & Data Science with hands-on experience in Python, Django, Flask, Machine Learning, and Generative AI. Built multiple end-to-end web applications and AI-powered solutions through academic projects and internships. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and software development. Passionate about developing scalable, customer-focused software solutions while continuously learning modern technologies.

EDUCATION

B. Tech - Artificial Intelligence & Data Science
Vivekananda College of Technology for Women | CGPA: 8.17/ 10.0 | Expected Graduation: 2027
Higher Secondary (Class XII)
Sri Ragavendra Matric Hr. Sec. School | Score: 76%

TECHNICAL SKILLS

Programming: Python, Java, C++, C
AI & Machine Learning: Machine learning, Deep learning, Scikit-learn, Pandas, NumPy, Seaborn.
Web Development: Django, Flask, HTML, CSS, JavaScript.
Database: SQL, SQLite.
API &Tools: Google Gemini API, Git, GitHub, VS Code, Google Colab, Excel, Word, MS PowerPoint, IDLE.
Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, Cyber Security.

PROJECTS

Online Book Store with AI-Powered Summaries | Django, Python, SQLite, Google Gemini API
- Developed a full-stack Django web application with authentication, cart, book management, and responsive UI.
- Integrated Google Gemini API to generate AI-powered book summaries.
- Built an admin dashboard for efficient content management.

Smart Expense Tracker | Django, Python, SQLite
- Developed a secure personal finance application with authentication and CRUD functionality.
- Implemented automatic expense categorization using NLP-based keyword analysis.
- Visualized spending trends using Chart.js dashboards. Designed scalable backend architecture using Django.

Sleep Quality Prediction System | Python, Flask, Scikit-learn, Pandas
- Built a Flask-based machine learning application to predict sleep quality.
- Trained a Random Forest model using Scikit-learn.
- Implemented preprocessing, feature engineering, and real-time predictions.

INTERNSHIPS

Generative AI Intern | AdroIT Technologies (Oracle Authorized Partner) | Oct 2025
- Completed Generative AI Internship under the Naan Mudhalvan Scheme, gained practical exposure to AI model development and applications

Python Project Intern | Cybernaut Edu Tech Pvt. Ltd. | Karur | Nov 2025 – Feb 2026
- Developed Python-based projects involving web scraping, data processing, machine learning, Flask, and Django.
- Implemented Python data collection and preprocessing workflows to support software and machine learning applications
- Built and enhanced web applications using Python, Flask, Django, and database integration.
- Collaborated with team members to analyze requirements, troubleshoot issues, and deliver functional solutions.

Web Development Intern | Code bind Technologies | Chennai | Dec 2025
- Developed and modified web applications using HTML, CSS, JavaScript, and PHP.
- Assisted with backend integration and debugging of web application functionality.
- Collaborated with the development team to implement assigned features and resolve technical issues.

CERTIFICATIONS

- Hacker Rank - Data Structures & Algorithms | SQL (Basic)
- IBM Career Management Essentials | IBM Project Management Fundamentals
- IBM Craft Precise Prompts for AI Models | IBM Artificial Intelligence Fundamentals

ACHIEVEMENTS

- Earned 5-Star ratings in Python, C++, and Java on Hacker Rank.
- Solved data structures and Algorithms problems on LeetCode. | NPTEL - Introduction to Internet of Things
