PROJECTS

Blood Bank Management System
Tracks available blood units, matches donors with patients instantly, and ensures quick, accurate delivery during emergencies.

Spam Mail Detection System
Automatically scans incoming emails and instantly blocks or filters suspicious messages to protect the inbox.

Intelligent Paper-to-Digital Conversion with Analytics
Converts handwritten and printed documents into structured digital text using OCR and NLP, going beyond simple scanning to extract key insights and trends from the digitized content. Enables searchable, analyzable records that turn static paperwork into a data source for decision-making.

Non-Invasive Health Monitoring System
Monitors vital signs like heart rate, temperature, and oxygen levels using non-contact sensors, eliminating the discomfort and risk of invasive procedures. Provides real-time alerts for abnormal readings, making continuous health tracking safer and more accessible, especially for elderly or high-risk patients.
