HEMA M

ECE Undergraduate|Hardware&Software Enthusiast

+91 8248713957 hema.m2186@gmail.com Namakkal,TamilNadu www.linkedin.com/in/hema-m-4779093b7

OBJECTIVE

Motivated ECE undergraduate with a strong foundation in Python, programming, and logical problem-solving.
Seeking an opportunity to apply my skills in AI Agent development, system design, and intelligent solutions.
Eager to learn, innovate, and contribute to reliable, real-world AI-powered application.

EDUCATION

Bachelor of Engineering - Electronics and Communication **CGPA 8.2** 2023-2027
Vivekanandha College of Engineering for Women
Higher Secondary Education (HSC) **Percentage 83.5** 2022-2023
Government Higher Secondary School, Tho.Jedarpalayam.

INTERNSHIP

SDLC COMPANY | Front-End Development

- Developed responsive interfaces and implemented user requirements using HTML, CSS and JavaScript.
- Performed testing and debugging to improve functionality and user experience.

Caliber Embedded Technology | Embedded System

- Programmed microcontrollers and integrated sensors for embedded applications.
- Tested system behavior, validated outputs, and resolved functional issues through systematic debugging.

Adventure Technology — Embedded Systems & IoT

- Worked with microcontrollers and sensors for IoT-based applications.
- Tested integrated systems and validated functionality through structured troubleshooting.

HACKATHON

MSME Hackathon

- Developed a smart digital PDS ration distribution system. Proposed an IoT-Based solution for efficient ration distribution

Smart India Hackathon (SIH):

- Proposedasmart toilet solution for persons with disabilities. Focused on accessibility, safety, and independent use.

PROJECT

- Hydropower Plant & Flood Management Developed a water management system for efficient power generation, flood prevention, and water-level monitoring.
- EMG-Based Intelligent Bionic Hand for Natural and Responsive Movement Developed an intelligent bionic hand using EMG signals to control hand movements naturally and responsively. Designed the system to interpret muscle signals and enable precise, user-controlled movement.
- Built an AI-powered chatbot in Python (Google Colab) integrating a Generative AI API to answer hospital-related queries _ doctor availability, appointments, bed status, and general information.

CERTIFICATE

CYBERNAUT-PROGRAMMING LANGUAGE- C++,JAVAPYTHON **|CALLIBER EMBEDDED TECHNOLOGY -** Embedded Systems **| SDLC COMPANY -** Frontend Framework| **UIDeveloper- Angular** Framework

SKILL

Technical skills

- **Python | C**
- HTML| CSS | JavaScript
- Embedded C
- DSA | AI/ML Fundamental
- Cloud Fundamental

Language

- Tamil
- English
- Japanese(Basic)

Soft skills

- Effective Communication
- Teamwork & Collaboration
- Leadership
- Problem Solving

DECLARATION

I hereby declare that the information provided is true and accurate to the best of my knowledge and belief.
