PROFESSIONAL SUMMARY

Final-year B.Tech Information Technology student with hands-on experience in software development and AI through internships and academic projects. Proficient in Java, Python, SQL, and object-oriented programming, with a strong foundation in problem-solving and software engineering principles. Passionate about building practical applications and eager to contribute as a Software Engineer or AI/ML Engineer while continuously learning and growing in a collaborative environment.

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML, CSS

Machine Learning / AI: NLP, Classification, Regression, Feature Engineering

Analytics & Visualization: Power BI, Tableau, Data Preprocessing

Tools & Platforms: VS Code, Git, GitHub, Figma, Google Colab

Methodologies: Agile, SDLC, Software Testing Concepts

INTERNSHIP EXPERIENCE

AI & ML Intern — TechForge, Salem *2025 – 2026*

- Built and evaluated machine learning models for classification and regression tasks using Python, within an Agile SDLC team environment.
- Applied data preprocessing, analytics, and reporting techniques to support cross-functional decision-making across design, development, and evaluation phases.

Java Intern — Emglitz Technologies, Coimbatore *2025*

- Developed backend systems using Advanced Java, following a structured SDLC workflow spanning design, development, testing, and documentation.

PROJECTS

Smart Resume & Job Matching *Python, NLP, SQL*

- Built an NLP-based resume-parsing and job-matching system using machine learning text-similarity techniques, with a SQL backend to manage user profiles and job postings.
- Performed text preprocessing and similarity analysis in Python to improve matching accuracy.

AI Meeting Cost Calculator *Python, ML*

- Designed and built a dashboard tool to estimate meeting costs based on participant roles and duration.
- Implemented cost-estimation and efficiency-tracking logic to support organizational analytics use cases.

MindScope — AI Mental Health System *Python, ML, NLP*

- Developed an AI system that analyzes user mental state through structured, psychology-inspired questionnaires, using NLP and ML techniques to classify patterns.
- Built an end-to-end pipeline covering data collection, preprocessing, model analysis, and result visualization.

Sports Talent Assessment *Smart India Hackathon — Python, AI, Analytics*

- Led a cross-functional team of 6 to design and build a computer vision and performance analytics system for sports talent evaluation.
- Represented the team at Smart India Hackathon 2024 and 2025.

EDUCATION

B.Tech — Information Technology *Expected – 2027*
Nandha Engineering College — CGPA: 8.5

Higher Secondary *2022 – 2023*
Shri Vigneswara Vidyalaya — 82%

CERTIFICATIONS

- Microsoft — Azure AI Fundamentals
- Infosys Springboard — AI Primer, AI Foundation, Python Foundation, Pragati Women in Tech
- Deloitte — Data Analytics Virtual Internship
- NPTEL — Design and Implementation of Human-Computer Interface; Privacy & Security in Online Social Media

ACHIEVEMENTS

- Smart India Hackathon 2024 & 2025 — Participant
- Blockathon — CIT Coimbatore
- Innovation Day Presenter — NEC Erode
