PROFESSIONAL SUMMARY

Electronics and Communication Engineering student skilled in full-stack development, with particular expertise in MERN stack technologies and Experienced in handling client-side projects and building efficient, user-focused solutions with strong problem-solving abilities. A quick learner committed to contributing technical skills and innovative ideas to support organizational growth and success.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

M Kumarasamy College of Engineering, Karur | CGPA: 7.92 (till 5th Semester) | 2023 – 2027

Higher Secondary Certificate (HSC)

RKV Matric Higher Secondary School, Namakkal | Percentage: 88.18% | 2022 – 2023

Secondary School Leaving Certificate (SSLC)

RKV Matric Higher Secondary School, Namakkal | 2020 – 2021

TECHNICAL SKILLS

- Programming Languages: C (Basics), Java (Intermediate), Python (Basics)
- Web Development: MERN Stack – MongoDB, Express.js, React.js, Node.js (Intermediate)
- Databases: MongoDB, MySQL(Intermediate)
- Cybersecurity: Black Box Pentesting (Basics)
- Operating Systems: Linux , Windows

PROJECTS

Temple Family Tree Management System – Full-Stack Developer, Team Lead, Solution Architect

Tech Stack: React.js, Express.js, Node.js, MySQL (SQL DB) | Architecture: MVC

- Built a full-stack Temple Family Tree application using React.js, Node.js, Express.js and MySQL following MVC architecture.
- Designed a relational SQL database schema to store family member records, relationships, temple affiliations and generational data.
- Developed an interactive Family Tree View for visualizing ancestor-descendant hierarchies with dynamic node expansion and lineage tracing.
- Implemented RESTful APIs via Express.js MVC controllers for CRUD operations on family records, member profiles and temple data.

Task Manager Application – Full-Stack Developer

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Built a secure task management web application using the MERN stack with JWT-based authentication.
- Integrated bcrypt password hashing to ensure user credentials are stored and validated securely.
- Enabled smooth task creation, assignment, tracking and logout functionality with a clean React interface.

INTERNSHIP

InternPro – Backend Developer (Duration: 6 Weeks)

Project: Vulnerability Assessment Dashboard (Nmap UI) | Tools: Python, Nmap

- Developed a backend for a Vulnerability Assessment Dashboard providing a UI interface for Nmap network scanning.
- Automated scan processes using Python scripts to parse and display Nmap output in a structured dashboard format.

CERTIFICATIONS

- Introduction to Cybersecurity – Great Learning
- Firewall Fundamentals – Great Learning
- Cloud Computing – NPTEL (Score: 60%)
- ServiceNow Certified System Administrator (CSA) – ServiceNow

AWARDS & ACHIEVEMENTS

- Won 3rd Prize in Paper Presentation at Kongu Engineering College.
- Participated in Paper Presentation at KSR College of Engineering.
- Achieved Top 12 ranking among 67 teams in the Hackathon at KPR College of Engineering.
- Won 1st Prize in Chess Competition at M. Kumarasamy College of Engineering.

AREAS OF INTEREST

Digital Signal Processing | Signals and Systems | Cybersecurity

SOFT SKILLS

Effective Communication | Problem Solving | Quick Learner
