OBJECTIVE

I am a passionate Artificial Intelligence and Data Science student. To develop my skills in AI and contribute to innovative projects by gaining hands-on experience and learning new technologies through academic projects, internships, hackathons, and paper presentations, with a strong interest in applying analytical and problem-solving skills to real-world software and AI solutions

EDUCATION

B.Tech – Artificial Intelligence and Data Science *CGPA: 7.3*
Kongunadu College of Engineering & Technology (Autonomous),Trichy.
HSC*:* Oxford Matric HR.Sec School,Namakkal. *SCORE:78%*

TECHNICAL SKILLS

Programming Languages: Java, Python
Database: MySQL
Version Control: Git, GitHub,VSCode

INTERNSHIP EXPERIENCE

AI/ML Intern – Computer Vision & Machine Learning *[Sept- 2025]*
Inform Solution, Namakkal

- Gained hands-on exposure to computer vision techniques, including image processing and feature extraction, as part of AI-driven application development.
- Assisted in developing and testing machine learning models, contributing to data preparation and preprocessing workflows.
- Explored practical applications of AI/ML concepts under the guidance of the technical team, strengthening understanding of the model development lifecycle.

AI/ML Intern – Deep Learning *[Dec-2025]*
Future Wise, Coimbatore

- Worked with deep learning concepts and neural network architectures as part of guided project tasks.
- Supported data preparation and preprocessing activities for model training experiments.
- Participated in AI/ML experimentation, gaining practical insight into training and evaluating deep learning models.

ACADEMIC PROJECTS

AI-Based Skin Disease Detection and Treatment Recommendation

- Built a Convolutional Neural Network (CNN) based model to classify skin disease images and support diagnostic predictions.
- Implemented image preprocessing and data-handling pipelines to prepare inputs for model training and evaluation.
- Developed a Flask-based web interface to enable image upload and display prediction outcomes with basic treatment recommendation concepts.

Plant Growth Prediction Using Machine Learning

- Analyzed environmental and soil parameters to identify factors influencing plant growth patterns.
- Performed data cleaning and preprocessing using Pandas and NumPy to prepare the dataset for modeling.
- Built a machine learning model using Scikit-learn to predict plant growth trends based on input parameters.

HACKATHONS & PAPER PRESENTATIONS

- Participated in AI and Technology-based Workshops.
- Attended Technical Seminars on Artificial Intelligence and Data Science.
- Participated in Coding and Innovation Events.

CERTIFICATIONS

- NPTEL – Internet of Things (IoT)
- YellowMatics: Java fundamentals.

ACHIEVEMENTS

- Actively participated in hackathons, paper presentations, and technical events, reflecting consistent engagement within AI and software development communities.
