Career Objective

Motivated B.E. Electronics and Communication Engineering student at KSR College of Engineering with a CGPA of 7.54. Skilled in Embedded Systems, IoT, and PCB Design. Passionate about applying technical knowledge to contribute to organizational success and grow both personally and professionally.

Education

KSR College of Engineering, BE in Electronics and Communication Engineering **Aug 2023 – May 2027**
- CGPA: 7.54/10.0 (Up to 6th Semester)

Model School, Ramapuram, Higher Secondary Certificate (HSC) **Jun 2022 – Mar 2023**
- Percentage: 77.3%

Model School, Ramapuram, Secondary School Leaving Certificate (SSLC) **Jun 2021 – Mar 2022**
- Percentage: 100%

Practical Training

Embedded System, Taras Software Solution – Bangalore
- Learned the fundamentals and architecture of STM32 microcontrollers.
- Gained hands-on experience with GPIO, timers, and peripheral interfacing on STM32.
- Practiced embedded C programming and debugging using STM32CubeIDE.

Embedded and IoT, Crescent Infotech – Erode
- Completed in-plant training on Embedded Systems and IoT technologies.
- Gained hands-on experience with microcontrollers, sensors, and IoT communication protocols.
- Built a basic IoT-based project integrating sensors with microcontroller communication.

Projects

Smart Railway Track Monitoring System
- Designed a microcontroller-based system to detect railway track cracks and obstacles in real time using ultrasonic and IR sensors.
- Implemented wireless alert transmission to notify control stations instantly, improving track safety and reducing accident risk.
- Developed the prototype using Arduino/embedded C, testing it on a scaled model track to validate reliable fault detection.

Miniature Modular Weather Station Using Microcontroller
- Built a compact, modular weather station that measures temperature, humidity, and pressure using integrated sensor modules.
- Programmed the microcontroller to log and display real-time environmental data, enabling low-cost and scalable weather monitoring.
- Designed the modular hardware layout so individual sensor units can be added or replaced without redesigning the whole system.

Technologies

Technical Skills: Verilog HDL, PCB Design, Embedded & IoT, Functional Verification, Digital Electronics.
Technologies: Vivado software, EAD playground
Languages Known: Tamil, English.
