MOHANA PRASANTH P

Cybersecurity Fresher

6379661298 | mmohanaprasanth697@gmail.com | linkedin.com/in/mohanaprasanth-p

PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in SOC operations, SIEM, network security, and cybersecurity fundamentals. Skilled in using Microsoft Sentinel and KQL for alert investigation, log analysis, and incident response across Windows and Linux environments. Experienced in identifying suspicious activity, triaging alerts by severity, and documenting findings clearly. Looking to build a career in cybersecurity, contributing to security monitoring and threat detection from day one.

INTERNSHIP EXPERIENCE

Rezilyens System Software India Pvt Ltd — *Cybersecurity Intern (Present)*

- Monitor security tools and dashboards to identify and investigate suspicious activity and potential threats.
- Investigate and resolve security tickets, tracking each case from detection through to closure.
- Use Microsoft Sentinel to monitor alerts, analyze logs, and investigate potential attacks.
- Research and assess vulnerabilities (CVEs) to evaluate risk and support remediation efforts.

TECHNICAL SKILLS

SOC & Cybersecurity: SOC Operations & Security Monitoring, Alert Triage & Investigation, Incident Response Fundamentals, Threat Detection & Log Analysis, Phishing / Brute Force / Malware & Ransomware Analysis, IOC Analysis, CIA Triad, MITRE ATT&CK Fundamentals

SIEM & Security Tools: Microsoft Sentinel, KQL (Kusto Query Language), SIEM Concepts, EDR/XDR Fundamentals, Microsoft Defender Fundamentals, Splunk Fundamentals

Networking: OSI & TCP/IP Models, TCP, UDP, HTTP/HTTPS, DNS, DHCP, ARP, IP Addressing & Subnetting, Public & Private IP, Common Ports & Protocols, Firewall Fundamentals, Network Traffic Analysis

Operating Systems: Windows, Linux, Basic Linux Commands, Windows Event Logs

Programming & Development: Python, Java, C (Basic), HTML, CSS, Data Structures & Algorithms (Basic)

Tools & Platforms: Microsoft Sentinel, GitHub, VS Code

SOC KNOWLEDGE

- Understand Microsoft Sentinel as a cloud-based SIEM for security monitoring and threat detection.
- Familiar with collecting and analyzing logs from Windows systems, firewalls, VPNs, cloud services, and security tools.
- Basic proficiency writing KQL queries to search and analyze security events.
- Understand the SOC alert lifecycle: Investigate → Validate → Determine Severity → Respond → Document → Close/Escalate.
- Able to classify alerts as True Positive, False Positive, or Benign Positive.
- Familiar with common alert types: failed login attempts, successful login after multiple failures, suspicious IP activity, and malware-related events.

PROJECT

AgroPredict – Crop Price Prediction System

Built a hybrid AI-based crop price prediction system using ARIMA and LSTM models. Integrated SHAP and LIME for explainable, transparent predictions, and developed a web dashboard for real-time forecasting and decision support.

Technologies: *Python, Flask, TensorFlow/Keras, Scikit-learn, Pandas, NumPy, MySQL*

EDUCATION

AVS Engineering College — Bachelor of Engineering, Computer Science — CGPA: 7.5/10

Government Higher Secondary School — Class XII — 60%

KEY STRENGTHS

Security Monitoring, Analytical & Problem-Solving Skills, Attention to Detail, Incident Investigation, Team Collaboration, Quick Learner

LANGUAGES

Tamil (Native) | English (Professional Working Proficiency)
