Nithish P

AI & Data Science Student — Aspiring Data Analyst
nithish2k23@gmail.com — 8248989329
Thuraiyur, Trichy, Tamil Nadu

Summary

Motivated AI & Data Science student with strong foundation in problem-solving, debugging, and full-stack development. Passionate about building intelligent systems that combine machine learning, security, and real-time analytics. Experienced in developing scalable applications and working with modern web technologies. Seeking opportunities to contribute to innovative AI-driven solutions and research-oriented projects.

Education

B.Tech in Artificial Intelligence and Data Science 2023–2027
Kongunadu College of Engineering and Technology
score 7.6 CGPA
Relevant Coursework: Machine Learning, Data Structures, DBMS, Computer Networks, Operating Systems

Higher secondary Education 2022–2023
Raj Vidhya Bhavan Matric Higher Secondary school
Score 71.8

Technical Skills

- **Programming:** Python, Java, C
- **Web Development:** HTML, CSS, JavaScript, React
- **Backend:** Node.js, Express.js, REST API Development
- **Database:** MySQL, MongoDB, Supabase
- **Tools:** Git, GitHub, VS Code, Postman
- **Core Concepts:** Data Structures, OOP, DBMS, Machine Learning, System Design Basics

Projects

Next-Generation AI-Based Human Verification System (No CAPTCHA)

- Designed an AI-driven authentication system eliminating CAPTCHA using behavioral biometrics
- Captured user interaction data including mouse movements, keystroke dynamics, and session behavior
- Implemented ML models (Random Forest, SVM) for real-time human vs bot classification
- Integrated **PhishLens** module to detect phishing attacks using URL features and page behavior
- Built full-stack architecture with React frontend, Node.js backend, and Python-based ML engine
- Developed admin dashboard with live analytics, geo-location tracking, and session monitoring

AI-Based Vehicle Detection and Traffic Analysis System

- Developed computer vision system for real-time vehicle detection using video streams
- Planned advanced features such as speed estimation, license plate recognition, and traffic flow analytics
- Designed integration with dashboard for visualization and monitoring of traffic insights

Full Stack E-commerce Web Application (MERN)

- Built scalable e-commerce platform with authentication, product management, and cart system
- Developed admin panel to manage users, products, and analytics
- Designed responsive UI with modern animations and improved user experience

Experience

MERN Stack Intern, Nexora Academy

- Developed full-stack applications using MongoDB, Express, React, and Node.js
- Built REST APIs and implemented authentication and database integration
- Gained experience in scalable system design and real-world project development

Achievements & Activities

- Participated in Industrial Visits at KGISL Coimbatore and Abservetech Madurai
- Actively preparing for inter-college hackathons and AI-based competitions
- Focused on building real-world projects in AI, Data Science, and Full Stack Development
