PROFESSIONAL SUMMARY

Seeking to explore my skills and knowledge, which help me contribute and explore ideas and problem-solving skills, which enhance my career growth for the company's development.

EDUCATION

B.E. Biomedical Engineering 2023 – 2027
Kongunadu College of Engineering | CGPA: 9.03

HSC (12th Standard) 2023
Bharathi Higher Secondary School, Reddipatti, Namakkal | Percentage: 80%

SSLC (10th Standard) 2021
Bharathi Higher Secondary School, Reddipatti, Namakkal | Percentage: 100%

TECHNICAL SKILLS

- **Core Field:** Biomedical Instrumentation, Diagnostic & Therapeutic Equipments.
- **Programming Languages:** Java, C++
- **Tools & Platforms:** GitHub ,Leetcode, Claude,Codetantra.

SOFT SKILLS

- Communication
- Teamwork
- Problem Solving
- Adaptability
- Time Management
- Leadership

PROJECTS

NeuroTemp — Smart Thermo Regulation Monitoring for Neurological Patients

— Developed a wearable temperature monitoring system to detect abnormal temperature variations in neurological patients at an early stage and support timely intervention.

– Integrated multiple temperature sensors with an ESP32 microcontroller and developed real-time monitoring using IoT-based software tools, enhancing my skills in embedded systems, sensor integration, and software development.

Early Sepsis Detection using Liver Indicators with Machine Learning

– Developed an early sepsis detection system by analyzing physiological signal variations and liver-related indicators to identify sepsis risk and help prevent severe complications such as organ failure.

– Implemented machine learning algorithms for risk prediction and integrated the model with an embedded monitoring system, strengthening my knowledge of machine learning, physiological signal analysis, and embedded systems.

NanoSense PharmaGuard — Smart Cold Chain Monitoring System

– Developed an NFC-enabled smart sticker for real-time monitoring of temperature, humidity, and light exposure of temperature-sensitive medicines, vaccines, insulin, and biologics during the cold-chain process.

.– Integrated nanosensor-based sensing, NFC technology, QR-based identification, and an AI-assisted monitoring system to detect storage-condition deviations and provide timely alerts, enhancing my skills in sensor technology, IoT, NFC, and AI-based healthcare applications.

ACHIEVEMENTS

- I proudly said that I am qualified for GATE 2026 in Biomedical Engineering with “Score of 304” and an “All India Rank (AIR) of 604”.
- I participated in an international-level hackathon at AMTZ CAMPUS, VISHAKAPPATTINAM.

CERTIFICATIONS & COURSES

- Biomedical Hardware Training Completed at ATHEENA PANDIAN.
- Value-added courses in Modeling And Simulation Using MATLAB & C
- Participated in various technical seminars and workshops

AREAS OF INTEREST

- Anatomy and Human Physiology.
- Pathology and Microbiology.
- Biomechanics.

INTERNSHIP

- Completed an internship as an Embedded System at WITSPIRE SOLUTIONS.
- Completed an internship as a lab intern at BBRC Research Institution in Trichy.
- Completed a Hospital Training at GVN RIVERSIDE SPECIALITY HOSPITAL in Trichy.

CO-CURRICULAR ACTIVITIES

- Presented a paper on “Nano Sense Pharma Guard Molecular-Level Cold Chain Integrity Monitoring” and Secured First prize.
- Presented a Project on "Non-Invasive Health Monitoring System using Breath Pattern Analysis” and Secured Second prize.

EXTRA CURRICULAR ACTIVITIES

- Member of ISTE (Indian Society For Technical Education).
- Member of Tamil Mandram and Zygote Club.
