SHEIK HUSAIN

CLOUD & AI ENGINEER | AWS | GENAI | DEVOPS

+91-6383199414 | developer.sheikhusain@gmail.com

Portfolio | LinkedIn | Lafz AI | PrintHub Website | PrintHub – Google Play

PROFESSIONAL SUMMARY

Cloud and AI Engineer with 4+ years of experience building AWS infrastructure, backend services, DevOps automation, and production AI applications. Experience includes AWS Bedrock Agents, LLM-powered workflows, RAG with OpenSearch, Kubernetes on EKS, CI/CD and GitOps, and secure multi-tenant SaaS deployment. Also builds and owns independent software products, including Lafz AI and PrintHub, from development through deployment.

PROFESSIONAL EXPERIENCE

Backend & AI Infrastructure Engineer | 2022 – Present

Cueverz, India

- Design and maintain cloud infrastructure and GenAI backend architecture for AI-driven SaaS platforms.
- Architected Roofex AI workflows using AWS Bedrock Agents and Lambda-based action groups.
- Designed cross-account SaaS deployment architecture inspired by the AWS Marketplace installation model.
- Built containerized microservices on Amazon EKS with Horizontal Pod Autoscaler (HPA).
- Implemented GitOps and CI/CD workflows using Argo CD, Helm, and GitHub Actions.
- Designed VPC networking with public/private subnets, Internet Gateway, NAT, and security groups.
- Configured Application Load Balancer canary routing and implemented Blue/Green deployments with AWS CodeDeploy.
- Integrated Amazon OpenSearch vector search for RAG-based retrieval; secured APIs with Cognito, JWT, and IAM policies.
- Supported high-availability systems serving 200+ active users and optimized infrastructure costs through right-sizing and scaling.

Cloud & GenAI Consultant | Independent Product Development | 2022 – Present

Independent / Remote

- Design and deploy AI-powered automation systems and AWS infrastructure for software products and startup projects.
- Developed and deployed Flutter mobile applications to Google Play.
- Built Lafz AI, an AI-powered social media automation platform, using AWS Bedrock and prompt-orchestration workflows.
- Integrated Claude 3 Haiku, Claude Sonnet 4.5, and Amazon Nova models through AWS Bedrock.
- Built document-ingestion and semantic-retrieval workflows for documents larger than 10 MB using OpenSearch.
- Delivered an AI-based SaaS solution for MP3 Nutrition Center.

INDEPENDENT PRODUCTS

Lafz AI — AI-Powered Social Media Automation Platform | lafzai.in

- Own and develop an AI automation product for content generation and workflow execution.
- Designed service-based prompt orchestration and integrated Claude and Amazon Nova models through AWS Bedrock.

PrintHub — On-Demand Printing Platform | printhub.lafzai.in | Google Play: com.printhub.app.printhub

- Own and develop PrintHub as an independent product, not a client project.
- Developed and published the Flutter mobile application and companion website for printing services.

SELECTED TECHNICAL PROJECTS

Roofex AI — Multi-Agent AI System

- Designed multi-tenant AI workflows using AWS Bedrock Agents and Lambda-based action groups.
- Implemented RAG with OpenSearch and deployed containerized services on Amazon EKS with autoscaling.

Cross-Account SaaS Deployment System

- Engineered secure AWS cross-account installation and tenant onboarding workflows.
- Automated IAM role provisioning and account-level resource access, inspired by the AWS Marketplace SaaS model.

Safe Safari — Ride Booking Platform | safesafari.in

- Developed user and driver Flutter applications with AWS-backed APIs, database, and authentication workflows.
- Implemented real-time ride requests and driver allocation, with Firebase authentication and JWT-based backend validation.

TECHNICAL SKILLS

Programming: Python, Dart, PHP, SQL
Cloud & AWS: AWS, EKS, EC2, S3, RDS, DynamoDB, VPC, IAM, Cognito, CloudFront, Route 53, ECR, CodeBuild, CodeDeploy, SQS, SNS, Lambda, API Gateway
AI / GenAI: Amazon Bedrock Agents and Action Groups, Claude 3 Haiku, Claude Sonnet 4.5, Amazon Nova 2 Lite, RAG, OpenSearch vector search, prompt orchestration
DevOps & Containers: Docker, Kubernetes, EKS, HPA, Helm, Argo CD, GitHub Actions, CloudFormation
Backend, Security & Data: REST APIs, JWT, IAM policies, VPC design, public/private subnets, security groups, Firebase Authentication, Firestore, Cloud Functions, Firebase Storage
Mobile & Integrations: Flutter, HTML5, jQuery, Google Maps Platform, Geolocation, Places API

EDUCATION

B.A. English Literature — Periyar University, Salem, India | 2018–2021
