SUMMARY

Computer Science Engineering student seeking an entry-level App Developer role, with a strong interest in Android application and software development. Familiar with C, C++, Python, HTML, Git, and GitHub, with Android and face recognition-based application projects. Practical experience using AI-assisted development tools, including ChatGPT, Claude, Cursor, and Antigravity.

TECHNICAL SKILLS

Programming:	C, C++
Programming Basics:	Python
Web Technology:	HTML
App Development:	Android Application Development
Version Control:	Git, GitHub
AI Development Tools:	ChatGPT, Claude, Cursor, Antigravity

EDUCATION

Bachelor of Engineering **Expected Graduation: 2027**

Computer Science and Engineering

SSM College of Engineering, Namakkal

Affiliated to Anna University

PROJECTS

Online Payment and Transaction through Face Pay

- Developed a face recognition-based digital payment application to enable secure transactions.
- Implemented facial authentication to verify users before processing payments.
- Focused on strengthening transaction security while improving user convenience.

Chess App using Anti-Gravity for Android

- Developed an Android chess application built around an Anti-Gravity gameplay concept.
- Implemented core chess logic and interactive game controls.
- Designed a simple, user-friendly interface for Android devices.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle University
- IBM SkillsBuild — Customer Engagement: Communication and Personality Dynamics
- Data Analytics MasterClass (30 Days) — NoviTech R&D Private Limited
- C++ Programming for College Students — Udemy
