PROFESSIONAL SUMMARY

Final-year Electrical and Electronics Engineering student from India with strong knowledge in power systems, SCADA, HMI, PLC programming, transmission and distribution, electrical machines, electrical protection, and renewable energy. Completed internships in solar energy and large-scale industrial electrical systems. Experienced in transformer operation, motor control and drives, power factor correction, and relay coordination. Seeking an international internship in power plants, renewable energy, or offshore wind energy.

EDUCATION

B.E. - Electrical and Electronics Engineering

Valalar College of Engineering and Technology, Erode, India | 4th Year, 7th Semester | Currently Pursuing

- Relevant Coursework: SCADA Systems, HMI, Transmission and Distribution, Renewable Energy Technologies, and Electrical Machines

HSC Class XII | 76.8%

SSLC Class X | Pass

Saratha Higher Secondary School, Gobi, Erode, India

INTERNSHIP EXPERIENCE

Internship - Turnon Energy India Pvt. Ltd., India

Solar Energy and Inverter Systems | Renewable Energy

- Gained practical exposure to solar power plant operations, photovoltaic system setup, real-time performance monitoring, and energy generation processes.
- Worked with inverter and power conversion equipment, understanding DC-to-AC conversion for grid-connected renewable energy applications.
- Assisted in inspection, testing, and routine maintenance of solar panels and associated electrical equipment.

Industrial Training - Sakthi Sugars, Appakudal, Erode, India

Industrial Electrical Systems | Power Distribution | Motor Control

- Observed high-voltage machinery, power distribution panels, and motor control and drive systems within a large-scale industrial power infrastructure environment.
- Gained exposure to electrical maintenance, fault identification, switchgear operation, and power factor correction under the guidance of senior engineers.

PROJECTS

Smart Energy Management System | National Level - CMTI Bangalore

- Built an IoT and relay-based system for real-time monitoring and automated control of home electrical components, demonstrating SCADA and HMI-style load management principles.
- Focused on reducing energy waste through automated relay control and real-time visibility of home electrical load.

Smart Electric Vehicle | Interdistrict Level - Kumaraguru College of Technology

- Designed and built a smart EV covering electrical system design, motor control, drive system integration, and battery management.

TECHNICAL SKILLS

Technical: SCADA Systems, HMI, PLC Automation

Soft Skills: Discipline, Adaptability, Teamwork, Problem Solving, Leadership, and Communication

COURSES COMPLETED

• PLC Programming - Completed a course in PLC programming covering ladder logic, input/output configuration, and industrial automation control.

• HMI (Human Machine Interface) - Completed a course in HMI design and configuration, covering screen design, tag linking, alarm management, and real-time data visualisation.

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

NCC Cadet - B Certificate Holder, India

• Completed full NCC training programme, earning the B Certificate through consistent performance in leadership, drills, and community service.

• Developed strong discipline and team coordination skills suited to high-responsibility plant and energy environments.
