PROJECTS

Medical Image Analysis using Federated Learning | Python, Py Torch, Deep Learning, SFDA, Knowledge Distillation

- Developed a privacy-preserving medical image analysis system using Federated Learning without sharing sensitive patient data.
- Implemented Source-Free Domain Adaptation and Knowledge Distillation to adapt models across different medical imaging domains.
- Utilized pseudo- labeling and consistency learning to improve model performance on unlabeled target-domain images.
- Evaluated the adapted model on target-domain medical images and improved generalization to unseen imaging conditions.

Quick Fix – Smart Location-Based Service Finder | JWT Authentication, MongoDB, React.js, Node.js

- Developed a location-based service platform to help users find nearby plumbers and electricians using geolocation and map integration.
- Implemented JWT authentication, service booking, provider management, and real-time communication through Call and WhatsApp integration.
- Built responsive React interfaces for seamless service discovery, booking, and provider interactions.
- Integrated MongoDB and RESTful APIs to manage users, service providers, bookings, and location-based service data.

EXPERIENCE

Full Stack Development Intern

- Built and deployed MERN stack features for 3+ client projects using Agile/Scrum, and developed secure RESTful APIs with optimized query performance.
- Actively contributed to Git workflows, code reviews, and sprint ceremonies, ensuring on-time delivery and high code quality.

ACHIEVEMENTS & LEADERSHIP

Placement Coordinator – Organized placement drives and facilitated recruitment activities, ensuring smooth coordination between students and recruiters. Also participated in Smart India Hackathon (SIH) as a developer.

Sports & Cultural Achievements – Table Tennis: 1st Prize; Volleyball: 3rd Prize (Anna University Zonal) & 2nd Prize (Inter-Year); Drawing Competition: 3rd Prize (Tamil Club).
