Technical Skills:

- **Languages**: Python, Java, SQL, HTML/CSS
- **Frameworks**: React.js, Flask
- **Libraries**: pandas, NumPy, Matplotlib
- **Developer Tools**: Git & VS Code

Technical Certifications:

- **Confluent Certified Administrator for Apache Kafka** (Certificate no: 189799062), July 2026
- **Coursera Certificate: Crash Course on Python,** 2025

Education:

Graduation

- Bachelors of Engineering in Computer Science [*GPA: 7.77*]

2023 - 2027 *Anna University, Chennai*

- Higher Secondary [*90%*]

2022 - 2023 *Sri Vidhya Bharati Matric High. Sec. School, Salem*

Internship / Training:

Swatsys Pvt. Ltd., Salem

05-Jun-2026 – 28-Jul-2026 *Salem*

Achievements/Tasks

- Trained as Confluent Kafka Administrator and **Certified in CCAAK**.
- Had training on core concepts of Confluent Kafka.
- Like: Producer, Consumer, Broker, Topics, Partitions, Offsets, Zookeeper, Kraft.
- Handled BAU activities like:
  - Performed Kafka topic administration tasks including
    - ✓ Topic creation
    - ✓ Listing
    - ✓ Description
    - ✓ Configuration
    - ✓ Alteration
    - ✓ Deletion
  - Provided user and service-account access to Kafka topics using RBAC-based authorization and appropriate permissions.
  - Monitored Kafka topic throughput and message traffic to ensure optimal performance and identify potential issues.
  - Reconfiguration of Retention periods & Partitions.
  - Rolling Restarts on Kafka services during maintenance activity.
  - Managed Apache Ranger authorization policies for Kafka topics, users, and service accounts.
- Created a dedicated Confluent Kafka cluster, including brokers, topics, partitions, and replication settings.
- Done end to end POC of producing a message to topic and consumed the message from the same topic.

Project1:

Voice2Vision – AI Meeting Notes Generator

7th Semester, 2026

Technologies: Python, Flask, OpenAI Whisper, Google Gemini API, SQLite, JavaScript, HTML/CSS, FFmpeg

Achievements/Tasks

- Developed an **AI-powered meeting assistant** that converts recorded meeting audio into accurate text transcripts using **OpenAI Whisper**.
- Integrated **Google Gemini API** to automatically generate structured **meeting summaries, action items, decisions, deadlines, task owners, and keywords** from transcripts.
- Built a **Flask-based web application** with audio recording/upload functionality and persistent **SQLite database** storage for meeting records.
- Designed an end-to-end pipeline for **audio processing → speech-to-text → LLM analysis → structured meeting notes**, with options to view and manage previous meetings.
- Implemented **PDF/DOCX export** and a meeting-history interface for accessing generated notes.

Project2:

Student Management System

Technologies: Python, Flask, SQLite, JWT, HTML, CSS, JavaScript

Achievements/Tasks

- Developed a web-based Student Management System using **Flask and SQLite** to create and retrieve student records, including PII data.
- Implemented **JWT-based authentication and authorization**, with password hashing using Werkzeug and protected APIs for student creation and search operations.
- Built a responsive frontend using **HTML, CSS, JavaScript, and Fetch API**, enabling login, student registration, authenticated searching, session handling, and logout functionality.
- Designed a relational SQLite database with separate **student, student_address, and users tables**, using parameterized SQL queries and JOIN operations for secure data access.
