GOWTHAM K

DATA ANALYST

Palladam, Tiruppur, Tamil Nadu, India — gowtamkumarakannan@gmail.com
+91 7339058587 — GitHub — LinkedIn

PROFESSIONAL SUMMARY

Aspiring Data Analyst and B.E. graduate in Electrical and Electronics Engineering with hands-on skills in Python, SQL, Excel, Power BI, Pandas, NumPy, Data Cleaning, Data Transformation, Exploratory Data Analysis, Statistics, and Machine Learning fundamentals. Familiar with Artificial Intelligence, Generative AI, NLP, LLM fundamentals, Prompt Engineering, and RAG concepts. Strongly interested in building a career in Data Analytics and applying data-driven and AI-based solutions to solve real-world business problems.

TECHNICAL SKILLS

Programming	Python
Data Analysis	Pandas, NumPy, Excel, Data Cleaning, Data Transformation, Exploratory Data Analysis
Data Visualization	Power BI, Excel Dashboards, Matplotlib, Plotly
Database	SQL, MySQL, Relational Database Concepts
Machine Learning	Machine Learning Fundamentals, Classification, Regression, Model Evaluation
AI / NLP	Artificial Intelligence, NLP Fundamentals, Generative AI, LLM Fundamentals, Prompt Engineering, RAG Fundamentals
Tools	Jupyter Notebook, Google Colab, PyCharm, Git, GitHub

TRAINING

Data Analysis with Python & AI – Anudip Foundation **June 2026 – Oct 2026**

- Learning Python-based data analysis using Pandas, NumPy, Excel, SQL, statistics, machine learning, and Power BI.
- Practicing data cleaning, data transformation, relationships, pivot analysis, dashboard development, and real-world data analysis.
- Currently working on an AI-focused capstone project applying data analysis, machine learning, and AI concepts.

EXPERIENCE

Engineering Intern – Pricol Engineering Industries Pvt. Ltd., Coimbatore **Aug 2024 – Nov 2024**

- Gained practical exposure to Product Development and Manufacturing processes in an industrial environment.
- Applied engineering knowledge to understand real-world manufacturing workflows, process operations, and problem-solving practices.

PROJECTS

TrafficPulse AI – Smart Traffic Intelligence **Excel — SQL — Power BI**

- Developed a traffic intelligence solution to analyze congestion, vehicle flow, incidents, weather conditions, road risks, and traffic patterns.
- Built interactive Power BI dashboards with KPI cards, congestion hotspots, traffic risk analysis, incident impact, weather analysis, and road-level insights.
- Applied data cleaning, statistical analysis, machine learning concepts, and visualization to support data-driven traffic monitoring and decision-making.

Job Skill Gap Analyzer **Python — Pandas — NumPy — AI**

- Developed an AI-oriented solution to analyze job requirements and identify skill gaps between candidate profiles and target job roles.
- Used Python-based data processing and analysis to organize skills, compare requirements, and generate actionable insights.

Helio Charger **2025**

- Developed a project focused on analyzing solar and charging-related data to understand performance and usage patterns.
- Applied Python and data analysis concepts to process project data and derive meaningful insights.

EDUCATION

2025 **B.E. Electrical and Electronics Engineering** – Kathir College of Engineering **CGPA: 7.8/10**

2022 **Diploma in Electrical and Electronics Engineering** – Ambal Professional Group of Institutions **84%**

CERTIFICATIONS

Data Analysis with Python & AI – Anudip Foundation — Power BI – NoviTech R&D — MS Excel — Solar PV Technician — PCB Designing

ADDITIONAL INFORMATION
