EXECUTIVE SUMMARY

To secure a challenging position in a reputable organization where I can apply my technical skills, problem-solving abilities, and passion for software development.I aim to contribute to innovative projects that enhance my professional growth and benefit the organization

EDUCATION

M Kumarasamy College of Engineering - Karur, India **2022-2026**

Bachelor of Engineering in Electrical and Electronics Engineering; Aggregate: 6.7

TNPL Matric. Hr. Sec. School - Karur, India **2021-2022**

Higher Secondary; Aggregate: 62.5%

SKILLS SUMMARY

Languages: Python (Basics), Java (Basics), SQL.
Soft Skills: Leadership, Critical Thinking, Problem-Solving, Teamwork, Adaptability.
Area of Interest: Software Testing and Quality Assurance.

PROJECTS

Title: Smart Integrated Drainage Safety Framework for Solid Waste Classification, Worker Protection, and Hazardous Gas Monitoring
Role: Project Leader
Description: Developed and improved waste detection, gas monitoring and work safety using an IoT and AI-based drainage safety framework.

Title: Train Accident Prevention System
Role: Project Member
Description: Developed a smart train accident prevention system using sensors and a microcontroller for real-time obstacle detection, collision avoidance, and enhanced railway safety.

INTERNSHIP EXPERIENCE

Company: Chettinad Cement Corporation Ltd **June 2025 - July 2025**
Designation: Motor and Drive Systems Maintenance
Description: Gained hands-on experience in transformer operations, motor control units, industrial electrical systems and worked with motors, drives, and control panels to understand maintenance and real-time operations.

CERTIFICATIONS

- Certified in Bajaj Engineering Skills Training at SASTRA University, Thanjavur(BEST ESR).
- Certified in Microsoft Excel via Coursera.
- Certified in AI Ascend 2026 learning program via Kyndryl and AWS.
- Certified in Python Development via Infotact Solutions.
- Certified in Standard Test for English Proficiency with a score of 7 via The Hindu Groups.

ACHIEVEMENTS

- Presented a project titled “Smart Integrated Drainage Safety Framework for Solid Waste Classification, Worker Production, and Hazardous Gas Monitoring” in the IEEE International Conference on Technology and Management for Sustainable Development (ICTMSD-26).
- Presented a project titled “Hybrid Wire Detection System Using RF Signal Analysis and Inductive Sensing“ in the Project Expo.
