CAREER OBJECTIVE

Full-stack developer in the making — I turn ideas into working products across the MEAN stack, React, and Python/FastAPI, backed by two internships and four end-to-end builds spanning real-time systems, ML-driven recommendations, and secure APIs. Final-year B.Tech CSBS student looking to bring this hands-on, problem-solving energy to an MNC engineering team and grow into a developer who ships impact, not just code.

EDUCATION

B.Tech — Computer Science & Business Systems, Excel Engineering College *2023 – 2027*
CGPA: 8.5 / 10.0

Class XII — Al-Ameen Matric Higher Secondary School *2020 – 2021*
Percentage: 89.5%

Class X — Al-Ameen Matric Higher Secondary School *2018 – 2019*
Percentage: 89%

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript | Python and SQL (Intermediate) | Java (Basics)
Frameworks & Libraries: Angular, React.js, Node.js, Express.js, FastAPI, Django, Tailwind CSS, Vite
Databases: MongoDB, MySQL, PostgreSQL, SQLite, Firebase, Supabase
Tools, Cloud & Other: Git/GitHub, VS Code, Docker, AWS, Vercel, Socket.io, JWT Auth, Razorpay API, scikit-learn, REST API Design
Core Concepts: Object-Oriented Programming (OOPs)

INTERNSHIP EXPERIENCE

Full Stack Developer Intern — Global Software Solution, Coimbatore, Tamil Nadu *Dec 13 – Dec 24, 2025*

- Developed frontend interfaces using Angular and Tailwind CSS; built backend REST APIs with Node.js, Express.js, and MongoDB, following Agile sprint workflows.
- Used GitHub Actions for CI/CD and integrated Firebase for real-time data management.
- Debugged and optimized existing API endpoints, improving response consistency, and participated in code reviews with senior developers to align with team coding standards.

Full Stack Web Development Intern — EduTantr, Bangalore, Karnataka *Jun 10 – Jul 10, 2026*

- Connected a Node.js/Express backend to MongoDB, designing collections and schemas to support core application data; built and tested RESTful CRUD APIs.
- Worked hands-on with Angular for the frontend, integrating UI components with backend APIs; collaborated via Git/GitHub following Agile practices.
- Documented API endpoints and assisted in unit testing modules to reduce bugs before deployment, contributing to sprint demos and retrospectives.

PROJECTS

AI-Driven Career Advisory Platform (SkillPath AI) *Apr 2026 – May 2026*

- Built a full-stack career-guidance platform that parses uploaded resumes to auto-extract skills and matches users to suitable career paths using a scikit-learn cosine-similarity engine across role profiles (Data Scientist, ML Engineer, Full Stack Developer, and more).
- Implemented secure JWT + bcrypt authentication, course enrollment with progress tracking, and automated PDF certificate generation for completed courses.
- Built an AI advisor chat with skill-gap analysis and study-plan recommendations, plus an admin dashboard for user and platform analytics.

Tech Stack: *React.js, Vite, Tailwind CSS, FastAPI (Python), scikit-learn, Pandas, PostgreSQL, JWT, ReportLab*

Smart Café Management System (Royal Café) *Feb 2026 – Apr 2026*

- Developed a full-stack restaurant management system with real-time order tracking across kitchen, waiter, and admin dashboards using Socket.io.
- Built JWT-authenticated REST APIs for menu, inventory, staff, and reservations, and integrated QR-code based customer ordering with Razorpay payment processing.
- Added a tiered customer loyalty rewards program, an AI chatbot for menu assistance, and Chart.js-powered analytics reports for admins.

Tech Stack: *HTML5, CSS3, JavaScript, Node.js, Express.js, SQL (SQLite/MySQL), JWT, Socket.io, Razorpay, Chart.js*

Price Negotiator Chatbot System *Jun 2025 – Aug 2025*

- Built an NLP-based negotiation chatbot that dynamically adjusts pricing offers based on user responses, exposed through RESTful APIs with live chat updates via Socket.io.
- Deployed the application on AWS Elastic Beanstalk with S3 for static hosting and CloudWatch for monitoring, with JWT-secured endpoints.

Tech Stack: *Angular, Node.js, Express.js, MongoDB, Socket.io, JWT Auth, AWS (Elastic Beanstalk, S3, CloudWatch)*

Payroll Management System *Nov 2024 – Jan 2025*

- Built an HR payroll application that automates salary calculation, leave tracking, and payslip generation, with role-based access control separating HR and employee views.
- Containerized the application with Docker and set up a GitHub Actions CI/CD pipeline for automated builds and deployment.

Tech Stack: *Angular, Node.js, Express.js, MongoDB, Bootstrap, Docker, GitHub Actions*

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner — AWS
- Web Development Fundamentals — L&T
- Machine Learning Certification — IBM
- SQL (Intermediate) — HackerRank
- AI in Cyber Security — L&T
- Computer Networks & Internet Protocol — NPTEL
- Essential Python Skill — Marchello Tech
- 48-Hr Hackathon Participant — Dayananda Sagar Univ.
- Fundamentals of Python — Imagecon Academy
- Technoverse Hackathon 2026 — Cognizant
