CAREER OBJECTIVE

Motivated and detail-oriented Computer Science and Business Systems student seeking a Web Developer position to utilize my knowledge of HTML, CSS, JavaScript, and Django in developing responsive, user-friendly, and efficient web applications. Eager to contribute to real-world projects, continuously enhance my technical skills, and deliver innovative web solutions that meet organizational requirements.

EDUCATION

B.Tech Computer Science and Business Systems (Pursuing) **2023 – 2027**

Excel Engineering College

HSC – 84.5% **2022 – 2023**

K G G Hr. Sec School

SSLC - 100% **2020 – 2021**

SPB School

PROJECTS

MEDICAL CAMP REGISTRATION AND MANAGEMENT SYSTEM

- Developed a web-based Medical Camp Registration and Management System for patient registration, appointment scheduling, and camp management.
- Designed a secure and user-friendly application using HTML, CSS, JavaScript, Python, and MySQL to improve healthcare data Management.

SMART REAL TIME TRAFFIC FLOW PREDICTION SYSTEM

- Developed a Smart Real-Time Traffic Flow Prediction System using Machine Learning to analyze traffic patterns and predict congestion accurately.
- Implemented predictive analytics to optimize route planning, enhance traffic management, and support efficient transportation Decisions.

CUSTOMER SUPPORT TICKET MANAGEMENT SYSTEM

- Developed a web-based Customer Support Ticket Management System that allows users to raise support tickets, track their status, and receive updates, while admins can manage and resolve customer requests efficiently.
- Implemented features such as user login**,** ticket creation**,** status management**,** and admin dashboard, using HTML, CSS, JavaScript, Django, and database connectivity to maintain and manage support information.

INTERNSHIPS

MACHINE LEARNING INTERN **Dec 2025**

New Technology Career Solution, Coimbatore

- Worked on a Student Performance Prediction System by collecting and preprocessing student data, training a machine learning model, and analyzing the results to predict academic performance. Gained practical experience in Python, data handling, model training, and basic machine learning concepts during the internship.

WEB DEVELOPMENT INTERN **Dec 2024 – Jan 2025**

Liveware, Tiruchengode

- Worked on web application development using HTML, CSS, and Java Script by creating responsive web pages, implementing basic backend functionality, and connecting the application with a database. Gained practical experience in frontend development**,** server-side integration**,** database connectivity, and application flow during the internship.

HARDWARE - QUALITY CHECKS INTERN **June 2026**

Delphi-TVS, Oragadam (20 Days)

- Learned about production line inspection and quality checks in a manufacturing setup

CERTIFICATIONS & COURSES

- Django Framework - Value Added Course
- Comprehensive Guide to Generative AI - L&T EduTech (LearnKonnect), 2026
- NPTEL Certified (Elite) - Cloud Computing, IIT Kharagpur, Jan-Apr 2026
- Hackerrank certified – python(basics)

ACHIEVEMENTS & COMPETITIONS

- National Level Srinivasa Ramanujan Mathematical Competition 2025-26
- 3rd Prize in National level codathon at TechFest 2K25 - Paavai College of Engineering, April 2025.
- Participant - Blind Coding Competition, Karpagam Engineering College

SKILLS

Technical: HTML, CSS, JavaScript, Flask, Django, Java(Basics), GitHub, MS Word, Python(Basics)

Soft Skills: Problem-Solving, Communication, Team Work
