CAREER OBJECTIVE

Motivated B.E. Computer Science and Engineering student seeking an Android Applications Developer role, with hands-on experience in Kotlin, Android development, databases and modern development tools. Interested in building practical, user-focused applications and continuously improving technical skills through real-world projects.

EDUCATION

B.E. Computer Science and Engineering | JKKN College Of Engineering And Technology
2023 – 2027 | CGPA: 7.76 / 77.6%

TECHNICAL SKILLS

Programming: Java, Kotlin, SQL, XML

Android Development: Android Studio, MVVM, Room Database, Coroutines, Material Design, Firebase Authentication, Firestore, Firebase Storage, REST API, Retrofit,Apk Generations,

Tools: Git, GitHub, AI Studio, Supabase, Vercel, ChatGPT, Gemini-API Keys ,Razorpay-Payment Gateway,

INTERNSHIP & EXPERIENCE

Android Developer – Virtual Intern | CodeAlpha | 1 Month

Self-Practice & Independent Android Development | 18 Months

PROJECTS

Expense Tracker – Android Application | *Completed* | *Android Studio*

• Developed an Android application to track and manage daily income and expenses.
• Implemented Room Database with MVVM Architecture for efficient local data storage.
• Integrated Gemini AI to analyze user expenses and provide personalized financial suggestions.
• Built the application using Kotlin, Coroutines, ViewBinding, and Material Design for a responsive user interface.
•Implemented features including income & expense management, transaction history, AI assistant, and budget analysis.

AI-Enabled Web-Based Smart Canteen Management System | *Completed* | *Web-based*

- Developed a web-based smart canteen management system for managing canteen operations and customer orders.
- Implemented secure user authentication, menu management, order placement, and real-time order status tracking.
- Built an admin dashboard to manage menu items, customer orders, availability, and overall canteen operations.
- Integrated Supabase for database management, authentication, and backend services, ensuring reliable data handling.
- Utilized AI Studio during development and deployed the application on Vercel for scalable and accessible web hosting.

My Canteen – Android Application | *Ongoing*

- Developing a real-world Android application using **Kotlin and Android Studio** to digitize canteen ordering and management operations.
- Implementing customer features including **Firebase Authentication, menu browsing, cart management, order placement, and order tracking**.
- Using **Firebase Firestore** for cloud-based data storage and real-time synchronization between customers and canteen staff.

CERTIFICATION

App Development Virtual Internship – CodeAlpha | 20 August 2025 – 20 September 2025

LANGUAGES

Tamil, English
