PROFILE SUMMARY

Motivated and detail-oriented B.Sc. AI & Data Science student with a strong academic record (CGPA 9.1) and hands-on industry experience in full stack development and AI-driven product engineering. Proficient in **Python, Django and MySQL**, with proven expertise in building web applications, REST APIs and managing databases. Currently developing AI-powered enterprise solutions, and holds an **MSME-certified Graphic Design** qualification along with Generative AI certifications. Strong communicator and multitasker, eager to contribute to innovative technology teams.

TECHNICAL SKILLS

Programming & Backend	**Python** | **Django** | **REST APIs** | **Full Stack Web Development**
Database	**MySQL** | **Database Design** | **Query Optimisation**
AI & Data Science	**Generative AI** | **AI-Driven Automation** | **Data Analysis** | **AI Agents**
Design & Office Tools	**Adobe Photoshop** | **Adobe Illustrator** | **Graphic Design** | **Microsoft Excel** | **PowerPoint**
Soft Skills	**Strong Communication** | **Decision Making** | **Multitasking** | **Team Collaboration**

PROJECTS

Climate Guard
Python • Django • MySQL • AI/Data Analysis

- **Overview:** Climate monitoring and alert platform that collects climate data, analyses trends, identifies risk patterns and sends automated alerts so users can take early precautions.
- **Tech & Role:** Built the Django backend and MySQL database; applied data analysis / AI techniques for pattern detection and prediction.

ERP System
Python • Django • MySQL

- **Overview:** Enterprise Resource Planning web application digitising core operations: business workflows, inventory tracking and data management modules.
- **Tech & Role:** Designed the relational MySQL schema, developed Django models, views and templates, and optimised queries for reliable performance.

Email Agent (AI-Powered)
Python • Django • AI Models

- **Overview:** Intelligent email automation agent that uses AI models for smart email processing: understanding content, categorising messages and assisting with replies.
- **Tech & Role:** Integrated AI models with a Python/Django backend and MySQL storage to build a scalable, enterprise-ready solution.

INTERNSHIP EXPERIENCE

Software Development Intern | CubeAI Solutions, India
Current

- Developing AI-driven enterprise applications, including an **ERP system** and an **Email Agent**, using Python and Django.
- Handling database design and query optimisation with MySQL to build scalable product solutions.

Full Stack Development Intern | Gateway Software Solutions, Coimbatore
Completed

- Built full stack web applications using **Python and Django**; designed and managed MySQL databases.
- Worked on client-facing features and backend REST APIs within a professional team environment.

EDUCATION

Institution	Qualification	Score
K.S.R College of Arts & Science for Women	B.Sc. AI & Data Science (3rd Year)	CGPA: 9.1
Higher Secondary School	Class XII – State Board	92.6%
High School	Class X – State Board	93.3%

CERTIFICATIONS

- **MSME Graphic Design** – Government of India Certified (Adobe Photoshop & Illustrator)
- **Generative AI Courses** – SkillsBuild (all completed Generative AI certifications)
