PROFESSIONAL SUMMARY

IT undergraduate with hands-on experience building full-stack web applications using the MERN stack. Completed a Full Stack Developer internship delivering 3+ production React.js features, integrating REST APIs, Redis caching, and RAG-based AI models to improve data retrieval. Driven to keep growing as a full-stack developer.

EDUCATION

JKKN College of Engineering and Technology 2023 – 2027
B.Tech in Information Technology | CGPA: 7.8

Reliance Matric Higher Secondary School
Higher Secondary Certificate (HSC) | 65%

EXPERIENCE

Full Stack Developer Intern 17.7.2026 – 17.10.2026
UptoSkills (Remote)

- Built responsive user interfaces for 3+ features using React.js and Tailwind CSS, improving UI consistency
- Integrated REST APIs into frontend components, streamlining data-fetch handling and reducing request errors
- Collaborated with a 5-member team via Git and GitHub, enabling parallel development with no merge conflicts
- Implemented Redis caching and a RAG (Retrieval-Augmented Generation) model to optimize data retrieval and enhance AI-driven responses
- Contributed to the Intelliview Orchestrator project frontend with responsive layouts and component optimizations (GitHub)

PROJECTS

Lab Attendance System using Barcode MongoDB, Express.js, React.js, Node.js

- Developed a MERN stack web application to automate lab attendance using barcode-based identification
- Implemented a React-based frontend to scan and process barcode inputs for fast attendance marking
- Built RESTful APIs using Node.js and Express.js to manage student records and attendance data
- Integrated MongoDB for secure storage and efficient retrieval of attendance information
- Designed a responsive and user-friendly interface for smooth usage across devices

AURA – Personal AI Voice Assistant Python, Machine Learning, NLP, Speech Recognition

- Built a personal voice assistant using Python speech-recognition and NLP libraries to monitor and respond to user activity in real time
- Integrated a learning-based AI model that adapted responses based on usage patterns to improve reply accuracy over time
- Optimized the audio-processing pipeline to reduce response latency for a smoother, more natural interaction
- Enabled multi-language support, allowing natural interaction across different languages
- Implemented both online and offline communication modes for uninterrupted assistant functionality

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Frontend Technologies: HTML5, CSS3, JavaScript, React.js, Responsive Web Design, Tailwind CSS

Backend Technologies: Node.js, Express.js

Databases: MongoDB, MySQL (XAMPP)

Tools & Platforms: Git, GitHub, VS Code, XAMPP

CERTIFICATIONS & ACHIEVEMENTS

MEAN Stack Certification – WSA

Young Indians (Yi) – Active Participant, 2024 – 2025

LANGUAGES

Tamil: Native | English: Professional Working Proficiency
