DEVARAJAN L

Computer Science Engineering Student | Python & AI Developer

devarajanlakshmanan2525@gmail.com • +91 97888 82201 • linkedin.com/in/devarajan-l • github.com/Devarajan2355

OBJECTIVE

Computer Science Engineering student with hands-on experience building full-stack web apps, mobile applications, and AI-integrated tools. Proficient in Python and JavaScript with practical exposure to REST APIs, Firebase, and MySQL.

EDUCATION

B.E., Computer Science and Engineering *CGPA: 7.8 | Expected 2027*
Muthayammal Engineering College (Autonomous), Rasipuram

Diploma, Engineering *87% | 2024*
Maruthi Polytechnic College, Manivilundhan

HSC *67% | 2022*
Tagore Matriculation Higher Secondary School, Deviyakurichi

SSLC *87% | 2020*
Tagore Matriculation Higher Secondary School, Deviyakurichi

TECHNICAL SKILLS

Languages: Python
Frontend: HTML, CSS, JavaScript
Frameworks: Flask, Django
Databases: MySQL, MongoDB, Firebase
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Figma, MySQL Workbench

PROJECTS

Wallet Tracker — Personal Finance Mobile App *Flutter, Firebase*

- Developed a personal finance mobile app for tracking income, expenses, budgets, and savings goals.
- Implemented recurring expense tracking and CSV export to give users an easy way to review and analyze spending history.

Math Quiz Game *Python, Tkinter*

- Built a desktop math quiz game with a Tkinter GUI, letting users choose a specific operator (addition, subtraction, multiplication, division) or play in random-operator mode.
- Implemented dynamic question generation and score tracking to adapt difficulty based on the selected mode.

AI File Word Finder *Python, AI/NLP — Hackathon 2025*

- Built an AI-powered tool to search and locate specific words within a user-selected file as part of a 2025 hackathon.

ACHIEVEMENTS

2nd Place, Web App Track — HackIndia 2026*National Hackathon*

- Competed against teams from across India to build TruthLens, an AI deepfake face detection web app, securing 2nd place in the Web App track under time-constrained conditions.
- Built an AI-powered deepfake detection tool with a real-time web interface, combining a PyTorch/HuggingFace model backend with a Streamlit front end and OpenCV for image processing.
- Placed 2nd out of all competing teams in the Web App track at HackIndia 2026, delivering a working prototype under strict time constraints.

CERTIFICATIONS

- NPTEL Elite Certificate — Distributed Systems (8 weeks), Jul–Sep 2025
- NPTEL Elite Certificate — Edge Computing (8 weeks), Jan–Mar 2026
- Basics of Python — UniAthena, in partnership with Cambridge International Qualifications, UK
- Introduction to Generative AI Studio — Simplilearn SkillUp (Google Cloud Courses)
