SUMMARY

Final-year Computer Science student experienced in developing and maintaining Python APIs and responsive web pages using frontend libraries like React.js. Skilled in Python, JavaScript, React, Flask, MongoDB, and MySQL.

TECHNICAL SKILLS

Languages : Python
Frontend : HTML5, CSS3, JavaScript, React.js
Databases : MySQL, MongoDB
Backend : Flask
Tools & Platforms : Git, GitHub ,VS Code, Jupyter Notebook, MySQL Workbench

PROJECTS

TruthLens — AI Deepfake Detector | Python, PIL, OpenCV

- Developed and maintained a Python-based REST API (Flask) to serve real-time deepfake detection results from a PIL/OpenCV model, paired with a responsive frontend web page — 2nd place, HackIndia 2026.

Personal Finance Tracker

- Developed and maintained Python APIs and a responsive frontend web page for tracking income, expenses, and savings goals, with visual analytics and budget management features.

Leave Management System

- Developed and maintained backend APIs in Python to automate employee leave requests, approvals, and records, reducing manual HR workload and improving workflow efficiency.

Online Food Order

- Developed and maintained REST APIs in Python (Flask) and a dynamic frontend web page using React.js for real-time menu browsing, cart management, and order tracking.

ACHIEVEMENTS

HackIndia 2026 (Web App Track)

- Competed among teams nationwide to build Truth Lens, an AI deepfake face detection web app, securing 2nd place in the Web App track under time-constrained conditions.

EDUCATION

SSLC - Government High School, Koonavelampatti Pudur 2021| 100%

HSC - Sengunthar Magajana Higher Secendory School, Gurusamipalayam 2023| 68.8%

B.E. in Computer Science and Engineering 2027 (Pursuing)
Muthayammal Engineering College (Autonomous), Rasipuram | CGPA: 7.09

CERTIFICATIONS

NPTEL Elite Certificate — Distributed Systems (8 weeks) | Jul – Sep 2025

NPTEL Elite Certificate — Edge Computing (8 weeks) | Jan – Mar 2026
