PROJECTS

E-Commerce Sales Analysis | *Python (Pandas, NumPy) | SQL | Power BI* *(Link)*

- Built an interactive Power BI dashboard analyzing ₹62K in sales across 9 product categories, using SQL for data aggregation and Python for cleaning/transformation
- Surfaced category and regional trends (Electronics at 79% of revenue, South region at 40%) — a self-directed project to practice retail analytics end-to-end, from raw data to stakeholder-ready visuals

Web-Scraped Pricing & Sentiment Analysis Pipeline | *Python | SQL | MySQL | Power BI* *(Link)*

- Built an end-to-end pipeline: scraped pricing/rating data for 6 products, cleaned it with Pandas, and stored it in MySQL
- Ran sentiment analysis on customer reviews and designed a Power BI dashboard combining pricing, ratings, and sentiment scores — built to practice integrating structured storage with unstructured text analysis in one workflow

TRAINING & INTERNSHIPS

Deloitte — Data Analyst Job Simulation (Forage)

- Completed a virtual Data Analyst job simulation involving data analysis, visualization, and deriving business insights from datasets

Python Full Stack Intern — Infoem Software Solution, Namakkal *Feb 2026 – Mar 2026*

- Developed and validated 4 new backend API endpoints, enhancing application functionality and reducing data retrieval times by an average of 15% across key features

ACHIEVEMENTS

- Recognized as Best Performer for delivering analytical dashboards within project timelines.
- Improved reporting efficiency by automating Power BI and Excel reports for business teams.
