Career Objective

Motivated Computer Science Engineering graduate with hands-on experience in Java, Python, SQL, Machine Learning, and Web Development. Passionate about developing scalable software solutions and eager to contribute as a Software Developer while continuously learning modern technologies.

Internship

Predictive Analytics for Hourly-Based Score Estimation Using Machine Learning
Machine Learning Internship

- Built a predictive ML model in Python to estimate hourly-based performance scores from historical data.
- Executed the full ML pipeline end-to-end — data preprocessing, feature analysis, model training, and performance evaluation on a real-world dataset.
- Analyzed model output against actual scores to identify accuracy gaps and guide iterative feature refinement.

Projects

Predictive Analytics for Multiple Diseases Using Machine Learning
Academic Project

- Developed a machine learning model to predict diseases using health parameters such as blood pressure, glucose levels, and BMI.
- Performed data preprocessing and model training using Python machine learning libraries.
- Built a system to support early disease risk detection and healthcare analysis.
- Improved analytical thinking and problem-solving skills through model evaluation and optimization.

E-Commerce Web Application
Front-End Web Development Project

- Developed a responsive e-commerce webpage using HTML, CSS, and JavaScript.
- Implemented dynamic user interactions using JavaScript and DOM manipulation.
- Designed an intuitive user interface with responsive layouts, styling, and interactive elements.
- Enhanced user experience through real-time content updates and event handling.

SkyCast – Real-Time Weather Forecast Web Application
Web Development Project

- Developed a responsive weather forecasting web application using HTML, CSS, and JavaScript.
- Integrated the OpenWeatherMap API to fetch and display real-time weather information.
- Implemented features such as city-based search, GPS-based location tracking, and a 5-day weather forecast.
- Focused on responsive UI design and real-time data handling to enhance the user experience.

Skills

Languages	Java, Python
Web Technologies	HTML, CSS, JavaScript
Database	SQL, MySQL
Technologies	Machine Learning, DOM Manipulation
Soft Skills	Communication, Problem Solving, Teamwork, Adaptability, Time Management

Certifications

- Java Programming – L&T EduTech CollegeConnect Programme
- Data Analysis with Python – IBM Cognitive Class
- SQL and Relational Databases 101 – IBM Cognitive Class
- Recruitment ACE – L&T EduTech CollegeConnect Programme

Education

Bachelor of Engineering in Computer Science and Engineering
Mahendra Institute of Technology 2022 – 2026
CGPA: 8.7/10
