ADHITHYA V

DATA ANALYST

Sivagangai, India | +91 9585008182 | adhithyav82005@gmail.com

linkedin.com/in/adhithyav | github.com/adhithyav

Dynamic data analyst with expertise in Excel and Power BI. Skilled in Python fundamentals and MySQL, driving data-driven decisions. Proven ability to enhance team collaboration and efficiency, increasing project completion rates by 20%. Adept at transforming complex data into actionable insights, fostering innovation and growth.

EDUCATION

Bachelor of Technology: Information Technology / CGPA: 7.53 **Sep 2023 - May 2027**

Government College of Engineering / Erode

- Pursuing a Bachelor of Technology in Information Technology from Government College of Engineering, Erode, with an academic standing of 7.53. Expected to graduate in May 2027, developing a strong foundation in core IT principles and emerging technologies.

Hsc / Percentage: 87 **Mar 2023**

Sambaviga Higher Secondary School / Sivagangai

SSLC **Apr 2021**

Sambaviga Higher Secondary School / Sivagangai

SKILLS

- Excel
- Fundamentals of Python
- Power BI
- Mysql
- Leadership quality

PROJECTS

Web Scrapping

- Developed and implemented a robust web scraping solution to automate the extraction of large datasets from various websites, transforming unstructured HTML into structured formats such as CSV and JSON.
- Designed and deployed custom parsers and data cleaning scripts to ensure data integrity and accuracy across diverse web sources.
- Utilized Python with libraries like Beautiful Soup and Scrapy to efficiently navigate complex website structures and retrieve targeted information.
- Managed data storage and organization, facilitating streamlined access and analysis for downstream applications.
- Enhanced data acquisition efficiency, significantly reducing manual data collection efforts and improving data availability.

Virtual Mouse System

- Developed a real-time Virtual Mouse System to enable intuitive human-computer interaction through hand and finger gesture recognition, completing the project within a 3-month timeframe.
- Implemented advanced computer vision techniques for accurate hand movement detection and tracking, ensuring precise control over the mouse cursor.
- Engineered gesture recognition algorithms to interpret finger movements for various mouse click actions, including single-click, double-click, and drag-and-drop functionalities.
- Utilized Python and OpenCV for image processing, object detection, and real-time video stream analysis, optimizing performance for smooth user experience.
- Reduced reliance on traditional input devices by providing an alternative, accessible, and contact-free method of computer interaction.
