EDUCATION

Government College of Engineering, Erode 2023 – 2027

Bachelor of Technology in Information Technology — CGPA: 7.5+ (Till Date) Anna University

- **Core Coursework**: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, SQL, Solidity, HTML5/CSS3
Web: React.js, Next.js, Node.js, Express.js, GraphQL, REST APIs, JWT, OAuth 2.0, Webhooks
Systems & DevOps: KVM/QEMU/libvirt, Docker, GitHub Actions (CI/CD), Linux (5+ distros), Bash, Nginx, AWS EC2/S3, Zabbix
Databases & Tools: MongoDB, PostgreSQL, MySQL | Git, Qt6/CMake, Postman, Jest, VS Code

RELEVANT PROJECTS

Thirukkural Daily Widget | *Flutter, Android Widgets, Linux (Eww), Rainmeter* GitHub | F-Droid

- Developed a cross-platform open-source Thirukkural widget supporting Android, Linux (Wayland/X11), and Windows, delivering one of 1330 Kurals daily with zero cloud dependencies
- Implemented an offline-first architecture with customizable themes, scholarly commentary, and platform-specific widget integrations while maintaining battery-efficient operation

Tamil Technical Lexicon OCR Pipeline | *Python, OCR, PyMuPDF, PyTorch* Codeberg

- Built a resumable OCR pipeline to process 14 scanned Tamil technical dictionaries (˜5,600 pages) into structured English↔Tamil terminology datasets
- Implemented row-based bilingual term extraction with confidence scoring, GPU acceleration, and JSONL output for downstream NLP, semantic search, and AI-powered writing assistants

Ezhuthurukal – Tamil Font Discovery Platform | *React, Vite, Tailwind CSS* GitHub

- Built a community-driven platform for discovering, previewing, and downloading Tamil fonts with real-time rendering and searchable metadata
- Designed a scalable font indexing architecture and contribution workflow, enabling centralized access to Tamil typography resources for educational and research use

Smart Linux System Health Monitor | *C++, Qt6, CMake, KDE Connect* GitHub

- Built a graphical Linux system monitor with Qt6/C++ featuring real-time resource visualization and KDE Connect integration for remote monitoring
- Designed a cross-distribution compatible interface supporting remote command execution and system health summary retrieval

FOSS GCEE Website | *Next.js, Tailwind CSS, MongoDB, GSAP* GitHub | Live

- Developed the official website for the Free and Open Source Software Club at Government College of Engineering, Erode, showcasing events, resources, and community initiatives
- Built a responsive full-stack application with modern animations, dynamic content management, and production deployment to provide a seamless experience for club members and visitors

EXPERIENCE & ACHIEVEMENTS

Founder & Lead — FOSS Club, GCE Erode | fossgcee.vercel.app 2024 – Present

- Built and led open-source developer community from scratch; ran workshops on Linux, Git, KVM virtualization, and web dev — entirely self-taught and peer-driven, no live instruction
- Deployed club website with Docker, Nginx, and GitHub Actions CI/CD on a cloud VM; actively learning open source contribution practices

Full-Stack Development & Competitive Programming 2022 – Present

- Completed 15+ MERN stack projects; proficient Git workflows; won KDSH Quiz

WHY I'M A STRONG FIT

Final year IT student who builds real projects from scratch, ships across the stack, and learns from documentation and code review. Founded GCE Erode's FOSS Club to grow a peer learning culture — exactly the self-directed, craft-first mindset that drives strong engineering teams.
