PROFESSIONAL SUMMARY

Aspiring AI & Data Science graduate with strong problem-solving, communication, and technical support skills. Familiar with Python, hands-on experience in ML & NLP project development, and basic cloud concepts. Eager to leverage technical expertise in Software, Data Analytics, or IT support roles within a progressive organization.

SKILLS

Technical Skills
Programming Languages: Python
Libraries and Tools : NumPy, Pandas, Matplotlib, Scikit-learn, Google Colab
IDEs : VS Code, PyCharm, MS Excel (Intermediate), MS PowerPoint
Technical Support Skills : Troubleshooting, Operating System Basics, Basic Networking
Soft Skills : Communication Skills, Problem Solving, Team Collaboration, Adaptability

ACADEMIC HISTORY

KSR College of Arts and Science for Women, Tiruchengode
Bachelor of Science in Artificial Intelligence & Data Science
2023 – 2026 | CGPA: 7.8

Government Girls Higher Secondary School, Bhavani
Higher Secondary Education | Percentage: 62.6%

INTERNSHIPS & CERTIFICATIONS

Cybernaut Edu Tech Company | Software Development Intern |Duration: 3 Months
• Worked on live software projects using AI & ML techniques.
• Assisted in Python-based development tasks and project coordination.
• Collaborated with team members to improve problem-solving and technical skills**.**

Nitroware Technologies, Coimbatore | Internship Trainee |Duration: 15 Days
Project: Fake News Detection
• Developed a fake news detection model using NLP and machine learning concepts.
• Worked with supervised learning techniques for text classification.
• Improved understanding of Python and data handling processes.

AI Foundations Certification |Infosys Springboard & Great Learning
• Completed online certification courses covering AI, ML, and Deep Learning fundamentals.

PROJECT

Fake News Detection Software Project

- Developed an AI-powered system using NLP and machine learning models to classify fake and real articles.

Boston Housing Price Prediction Project

- Implemented a regression – based machine learning model to predict using the Boston Housing dataset. **Technologies used** : Python, Pandas, Scikit – learning, Matplotlib
