JOTHISWARAN M

Mechanical Engineering Student
TIRUPPUR|+919342831096|Jothiswaran.m_mech27@gcee.ac.in|https://www.linkedin.com/in/jothiswaran-m-2b463374

CAREER OBJECTIVE

An enthusiastic B.E. Mechanical Engineering student seeking an entry-level opportunity to apply my technical knowledge, develop practical skills, and gain industry experience. Eager to learn new technologies, take on challenges, and contribute effectively to the growth of the organization.

ACADEMICS

B.E. Mechanical Engineering *2023-2027*

GOVERNMENT COLLEGE OF ENGINEERING, ERODE | CGPA: 7.58/ 10

Higher Secondary (XII) *2023*

Government Model Higher Secondary School|84%

INTERNSHIP

1) Sarvamangala Engineers private Ltd *15 DAYS | JULY-2025*

- Supported manufacturing and engineering operations to enhance workflow.
- Cultivated teamwork and communications skills through collaborative projects.
- Responded swiftly to evolving demands in daily tasks to changing priorities while managing multiple tasks.

2) STECH Engineers *15 DAYS | JUNE-2026*

Topic: Lathe and CNC Machine Operations

- Gained practical knowledge of lathe and CNC machine operations and their basic working principles.
- Learned basic machining processes such as turning, facing, drilling, and other common machining operations.
- Practiced machine setup, workpiece handling, tool selection, and basic dimensional inspection with emphasis on safe operation.

PROJECTS

Smart Battery Health and Life Prediction using ESP32 *4th year*

Components: ESP32,12v Lead-Acid Battery,ACS712 Current Sensor,DS18B20 Temperature Sensor

- Developed an ESP32-based smart system to monitor battery voltage, current, and temperature for real-time battery health assessment.
- Collected sensor data to estimate State of Charge (SoC), State of Health (SoH), and Remaining Useful Life (RUL) of the battery.
- Displayed real-time battery health parameters and predictions on an OLED display for easy monitoring.

TECHNICAL SKILLS

CAD Tools: AutoCAD, Creo
Area of Interest: Machine Design, Strength of Materials, Thermodynamics, Manufacturing Processes
Electronics Knowledge: ESP32, Lead-Acid Battery, Sensor interfacing
Known Tools: MS OFFICE (power point, word)

PLACE: GCE, ERODE
DATE: 01/10/2026
