Rasipuram, Namakkal

Education

- **K.S. Rangasamy College of Technology** — Tiruchengode, Tamil Nadu
  B.E. CSE (Artificial Intelligence & Machine Learning), CGPA: 8.51/10 — *2022 – 2026*
- **RC Sacred Heart Higher Secondary School** — Rasipuram, Tamil Nadu
  Higher Secondary Certificate (HSC); Percentage: 83% — *2022*
- **RC Sacred Heart Higher Secondary School** — Rasipuram, Tamil Nadu
  Secondary School Leaving Certificate (SSLC); Percentage: 75% — *2020*

Skills

- **Programming**: Python, Java, SQL
- **AI/ML**: Machine Learning, Generative AI, Explainable AI (XAI), Retrieval-Augmented Generation (RAG)
- **Libraries**: Pandas, NumPy, Scikit-learn
- **ML Algorithms**: Linear Regression, Logistic Regression, Decision Tree, Random Forest, KNN
- **Web & Frameworks**: HTML, CSS, JavaScript, Streamlit
- **Tools**: Google Colab, Jupyter Notebook, VS Code, IntelliJ IDEA, Power BI, Tableau, Excel

Internship Experience

- **Cube AI Solutions** — Remote
  Data Analytics Intern — *April 2025 – June 2025*
  - **Fraud Detection**: Developed a fraud detection analytics dashboard using transactional data.
  - **Data Analysis**: Worked with data-driven analysis and model outputs to support fraud detection insights.
- **Virtunexa** — Remote
  Frontend Developer Intern – 4-week Internship — *February 2025 – March 2025*
  - **Frontend Development**: Developed web interfaces using HTML, CSS, and JavaScript that adapt to different screen sizes.
  - **Mini Project**: Completed a frontend mini-project with flexible layouts for different screen sizes.

Projects

- **AI Resume Interview Assistant – Generative AI** — *GitHub*
  Developed a Retrieval-Augmented Generation (RAG)-based conversational assistant for resume screening and job matching. Enabled interactive profile queries and automated candidate-job compatibility assessment. Applied Generative AI for document-based question answering and candidate-job analysis.
  Tech: RAG, Generative AI, FAISS, LangChain, Gemini API, FastAPI
- **Fetal Health Classification** — *GitHub*
  Developed a machine learning classification model to categorize fetal health as Normal, Suspect, or Pathological using cardiotocography (CTG) data. Performed data preparation, model training, and prediction, and integrated Streamlit for real-time predictions.
  Tech: Python, Pandas, NumPy, Scikit-learn, Random Forest, Streamlit
- **Predicting Mode of Childbirth Using Explainable AI and Ensemble Learning** — *GitHub*
  Developed an Explainable AI-based ensemble learning model to predict childbirth delivery type. Combined XGBoost, Random Forest, and Voting Classifier models and achieved 97.2% accuracy with SHAP-based interpretability.
  Tech: Python, XGBoost, Random Forest, Voting Classifier, SHAP, Streamlit

Achievements

- **First Place**: SheTech Research Expo Competition, 2025.

Certifications

- *Practical Machine Learning* – GUVI.
- *Python for Data Science* – NPTEL.

Publications

- **Predicting Mode of Childbirth: An Explainable AI-Based Ensemble Framework for Clinical Decision Support** : Presented at ICSETI 2026, IEEE UP Section Technical Co-Sponsorship.
