

ROHIT SARATHI K

Biomedical Engineer

8525921536 rohirohit075@gmail.com

Trichy , Tamilnadu

LinkedIn: linkedin.com/in/rohit-sarathi

SUMMARY

I am an innovation-driven Biomedical Engineering student with a strong interest in both hardware and software. I have experience in embedded systems, healthcare projects, Java programming, and IoT applications. I am eager to use my technical and problem-solving skills to contribute to healthcare, electronics, and software-related industries.

EDUCATION

Biomedical Engineering - Performance : 84%

Kongunadu College of Engineering and Technology , Trichy

2023-2027

HSE - Performance : 81%

Lakshmi Matriculation HIgher Secondary School , Manaparai

2022 - 2023

TECHNICAL SKILLS

- Python
- Medical Equipment Handling
- Embedded System Development
- HTML

SOFT SKILLS

- Leadership
- Adaptability
- Team Collaboration
- Critical Thinking

ACHIEVEMENTS

- **Runner-Up** –**National level Hackathon** - **India–Israel Hackathon** 2026 for developing a "Capacitive Deionization-Based Water Purification System".
- **Runner - Up**- EYEQINOVATE 2.0 for presenting GlaucoScan before top ophthalmologists and **StartupTN** evaluators.
- **Third Prize** – National Level Project Presentation Competition at PSR Engineering College.
- Shortlisted for the MSME 6.0 Idea Hackathon.

INTERN EXPERIENCE

Junior Engineer

June-2025

Galwin Technologies , Trichy

Worked on embedded system development by assisting in sensor interfacing, hardware integration, and circuit testing. Gained practical experience in debugging, validating embedded applications, and implementing IoT-based solutions.

Junior Lab Technician

December-2025

Poornam Speciality Laboratory , Nachalur

Assisted in routine laboratory diagnostics, sample processing, and documentation while ensuring compliance with quality and safety standards. Operated laboratory equipment and supported efficient laboratory workflow following standard operating procedures.

Biomedical Engineer

Sugam Hospital , Manaparai

May -2026

Gained practical exposure to hospital operations, medical equipment management, infection control practices, and clinical support services in a multidisciplinary healthcare environment.

PROJECTS

1.Interactive Gait Avatar Pattern with Real-Time Abnormality Detection and Feedback .

Developed a wearable gait monitoring system integrating sensor data with an interactive avatar for real-time gait visualization and abnormality detection. Designed a feedback mechanism to support rehabilitation and improve patient recovery.

2.Capacitive Deionization-Based Water Purification System .

Design and development of an energy-efficient water purification system using Capacitive Deionization (CDI) technology for sustainable desalination. Secured Runner-Up at the India–Israel Hackathon 2026 for the innovative solution.

CERTIFICATIONS

- NPTEL – Internet of Things | Elite + Silver (78%)
- Java Programming – Yellow Matics
- Medical Coding – Thought flows
- Biomedical Equipment Training - Atheena Pandian Academy

HOBBIES

- Exploring Emerging Healthcare Technologies
- Photography
- Trekking
