|Feb 2025 – Apr2025|

PROJECT

Comprehensive Restaurant and Food Supply Chain Solutions for Efficient Operations and Sustainability

- Centralized Management System**:** The project helps restaurants manage inventory, purchase reports, quality checks, and sustainability from a single platform.

- User-Friendly Interface**:** Restaurants can register, browse food items, add them to the cart, and automatically calculate the total cost.

- Quality and Sustainability Focus**:** It ensures all food products meet high quality and environmental standards.

- Real-Time Stock Tracking: The system allows restaurants to monitor inventory live and make smart purchase decisions.
