**LOGESH SENTHILKUMAR**

## Profile Summary

Dedicated and detail oriented Automotive Quality Engineer with 2+ years of experience as a Engineer at Renault Group, specializing in vehicle quality assurance, defect analysis, root cause investigation, and process improvement. Skilled in cross-functional collaboration, quality standards, and problem-solving, with a strong commitment to maintaining high manufacturing standards and delivering high-quality vehicles for continuous operational excellence.

## Professional Experience

**Graduate Engineer Trainee:**

Renault Group – April 2024 to April 2026

**Engineer:**

Renault Group – April 2026 to August 2026

Key Responsibilities:

- ❖ Supervised static Inspection activities to ensure vehicles met Renault quality standards after production. Conducted member inspection analysis and monitored Inspection effectiveness.
- ❖ Performed Outflow analysis and implemented containment actions to prevent customer defects.
- ❖ Conducted dynamic inspection to identify Functional and driving related quality Concerns, Monitored inspection quality and ensured adherence to standard operation procedures
- ❖ Supervised as Tester inspection activities, which includes Predrive inspection, Wheel alignment, Headlamp aiming, AVM Inspection, Roller, AC Leak Inspections.
- ❖ Performed defect identification, segregation and quality verification
- ❖ Prepared inspection reports and maintained quality documentations.
- ❖ Coordinate with Production, maintenance and cross functional teams for corrective and Preventive actions.
- ❖ Supported quality improvement initiatives to reduce defects.

## Core Competencies

- Documentation Tools: MSOffice, Adobe Acrobat, Quality Documentation.
- Technical Skills: Statistical Analysis, Strong Technical Analysis, Data Interpretation, People management and Shopfloor management
- Quality Engineering & Audit: Problem-Solving Methodologies (5 Why, Fishbone), Quality Management Systems (IATF 16949, ISO 9001), Continuous Process Improvement, Internal & External Audit Management,

Daily management Diagnosis, 7QC tools, 8D Root cause analysis, FMEA, Ergonomics.

- **Soft Skills:** Effective Communication, Analytical Thinking, Problem Solving, Time Management.
- **Strengths:** Team leadership and supervision, quality focused mindset, Effective communication, Documentation and reporting.

## Projects :

### QC Story – Inadequate repair Concerns reduction

Project Lead / Renault Group

Identified the Root cause analysis, implementing corrective actions, and strengthening quality control processes. Improved the repair quality by identifying recurring defects monitoring corrective actions, Minimizing repeat repair cases.

### Solar Based Electric Weeder

Team member / B.E – Final Year Project

Developed the Solar powered electric weeder to reduce the weed removal efficiency in agricultural field by the focus on energy efficient, eco-friendly and low maintenance cost.

### Vehicle to Vehicle Communication

Team Lead / B.E – Final Year Mini Project

Designed a prototype V2V Communication system to enable real time data exchange between vehicles for road safety in the concepts to transmit data like speed, distance, collision warning and emergency warning.

### Obstacle Detection and Object measurement

Team member / B.E – Third Year Mini Project

Linked in: https://www.linkedin.com/in/logesh-senthilkumar-344230211

## Educational Qualification

Bachelor of Electrical and Electronics Engineering || Sona college of technology. || May 2024

## Voluntary Activities

Secretary of Electrical & Electronics Department (2022- 2023)- Organized department Symposium and Cultural Fest.
