KEERTHIVASAN E T

Dharmapuri, Tamil Nadu | 8610656959 | keerthivasanet@gmail.com | linkedin.com/in/keerthivasan-e-t-907695291

PROFESSIONAL SUMMARY

Mechanical Engineer with hands-on experience in Product design with GD & T, ANSYS Workbench simulation, and IoT-based automation, seeking Design and Manufacturing Engineering roles. Designed and validated a nylon gripper finger combined gripping force, and led the mechanical, electronics, and firmware development of an ESP32-based gesture-controlled car. Gained shop-floor exposure to engine assembly and 5S practices during an internship at Ashok Leyland; SolidWorks and Six Sigma Green Belt certified.

EDUCATION

B.E. Mechanical Engineering Expected 2027
Government College of Engineering, Salem | CGPA: 7.98

HSC March 2023
Sri Vijay Vidyalaya Matric Hr. Sec. School, Dharmapuri | Percentage: 87.16%

PROJECTS

Nylon Gripper Finger Design & Analysis — *SolidWorks*
- Designed and analyzed a gripper finger using nylon material in SolidWorks to increase gripping and friction force over conventional metal fingers, which risked damaging held objects.
- Achieved a total gripping force of 41 N across both fingers combined.

Hand Gesture-Controlled Car Prototype — *Automation + IoT Based Project*
- Built a fully functional hand-gesture-controlled car, using an ESP32 transmitter fitted with an MPU6050 6-axis gyroscope to capture hand motion and an ESP32 receiver driving 2 motors via an L298N motor driver module, communicating over Wi-Fi.
- Contributed across mechanical, electronics and circuit wiring, and firmware coding to deliver a working demo.

Shock Absorber Design — *SolidWorks*
- Modeled a shock absorber assembly in SolidWorks as a self-driven learning project to strengthen mechanical design fundamentals.

EXPERIENCE

Intern Trainee December 2025
Ashok Leyland Unit 1
Hosur, Tamil Nadu — Mechanical Operations in Engine Assembly and Manufacturing Units
- Observed shop floor operations and maintenance activities in engine assembly units producing 3 engine types: ZD30, H Series, and P40.
- Learned the working of engine components, CNC processes, and material handling equipment.
- Applied 5S techniques to support workplace organization and process efficiency on the shop floor.
- Gained knowledge of quality control, defect identification, preventive maintenance, and safety practices in commercial vehicle production.

SKILLS & TOOLS

Design & Simulation: SolidWorks, ANSYS Workbench, Catia V5
Technical Skills: GD & T, 5S, PLM, Six Sigma
Soft Skills: Leadership, Adaptability, Teamwork

CERTIFICATIONS

- Six Sigma Green Belt — LinkedIn Learning
- SolidWorks — GUVI

CO-CURRICULAR ACTIVITIES

- **IV Coordinator** — Organized 3 Industrial Visits for the batch, handling end-to-end coordination, team responsibilities, and external communication.
- **Lead Rhythm Player**, Ethnic Tuners — Played rhythm in the college music club and performed at various inter-college cultural events.
