Salem, Tamil Nadu

PROFESSIONAL SUMMARY

Python Full Stack Developer with a strong foundation in building responsive and user-friendly web applications. Skilled in Python, Django, HTML, CSS, JavaScript, Bootstrap, MySQL, with knowledge of MVT, ORM, Django REST Framework (DRF), and REST APIs. Familiar with developing fron-tend interfaces, back-end applications, database operations, and integrating web technologies to build efficient and scalable solutions. Passionate about learning new technologies and contributing to real-world software projects.

SKILLS

- Back-end **:** Python, Django, MySQL
- FrameWorks **:** Django, API Testing **:** Thunder Client , Postman
- REST APIs, JWT Authentication, CRUD Operations
- Database **:** MySQL, CRUD Operations
- Front-end **:** HTML5, CSS3, JavaScript, Bootstrap
- Programming Language : Python -- Modules and Packages, OOP, Data structures, Functions, File Handling, List, Tuple, Set, Dictionary, Decorators
- Tools **:** **VS** code, PyCharm, MySQL Workbench, IDLE, Git & GitHub
- Core Concepts of Django **:** MVT, ORM, JWT, Django REST Framework (DRF), Role-Based Access control, REST API .

PROJECTS

E-COMMERCE - ORDER REST API USING (DJANGO REST FRAMEWORK (DRF))

https://github.com/dharanik531-arch/E-commerce-order-API-DRF-

- Developed an E-Commerce REST API using Python, Django REST Framework, and MySQL.
- Implemented user registration, login, JWT access/refresh token authentication, and protected profile APIs.
- Implemented a role-based user access control (RBAC) for admin and staff users.
- Developed Product APIs for retrieving and creating product data using GET and POST methods.
- Used Django ORM, ModelSerializer, REST API architecture, and JSON-based data exchange.
- Tested and debugged REST endpoints using Thunder Client.

BUSINESS INVENTORY MANAGEMENT SYSTEM (DJANGO MVT)

dharanik531-arch/Enterprice-management-system

- Developed a Django-based business inventory management system using MVT architecture serving multiple user roles.
- Built modules for product management, customer handling, order processing, and inventory tracking with real-time updates.
- Implemented authentication, login/logout functionality, and role-based user access control for admin and staff users.
- Developed automated billing workflows with GST calculations, reducing manual billing errors by 100%.
- Performed CRUD operations using Django Forms, Models, and Template rendering across 5+ core modules.
- Collaborated on testing and validation of inventory workflows to ensure data accuracy and system reliability.

STUDENT MANAGEMENT SYSTEM (DJANGO)

dharanik531-arch/student-management-system

- Developed a Student Management System using Python and Django MVT architecture to manage student informations .
- Implemented features for managing student details, courses, attendance, and academic records.
- Designed user-friendly interfaces using HTML, CSS, and Django Templates with database integration.
- Implemented CRUD operations to add, update, view, and delete student records.
