PROFESSIONAL SUMMARY

Linux System Administrator with 2 years of experience in managing and troubleshooting RHEL-based servers. Skilled in configuring and maintaining NFS, Samba, AUTOFS, HTTPD, and FTP services, along with LVM and storage management. Proficient in system Performance monitoring, troubleshooting, security hardening, and ensuring high availability.

TECHNICAL SKILLS

Operating Systems

Linux (RHEL, CentOS, Alma Linux, Ubuntu)
User Management, LVM, Disk Management, Swap Management, SSH, Cron Jobs, Patch Management, System Monitoring.

Networking & Services
Apache, NGINX, DNS, NFS, SAMBA, FTP, SMTP, TCP/IP, Firewall, SELINUX

Package Management
RPM, YUM, DNF.

Virtualization:
VMware Workstation, Snapshots, Templates.

Security:
Firewalls, SELINUX, ACLs, LDAP-based centralized authentication

Storage Management:
Logical Volume Manager, RAID, Disk Management.

Job Scheduling:
Cronjob

Archive Tools:
Zip, BZIP, GZIP, Tar.

File Transfer Protocol:
FTP, SFTP, SCP, WinSCP.

Permissions:
SETUID, SETGID, STICKY BIT, ACL.

User Management:
User creation, modification, and management.

Group Management:
Group creation, modification, and management

Performance Monitoring:
Top, Ps, IOSTAT, Netstat, Traceroute, NSLOOKUP, Ping

Trouble Shooting:
SSH, NFS, AUTOFS, Apache, Networking.

Cloud Platforms:
AWS (EC2, VPC, IAM, S3, EBS, EFS, RDS, ALB, Auto Scaling, Route53, CloudWatch)

PROFESSIONAL EXPERIENCE

Linux System Administrator /AWS System Administrator
INNOVSOURCE Technology Services -Coimbatore
(Client: SBI Bank) August2023 to Jul 2025

Project: SBI Bank -Linux Infrastructure Support

Linux Administration

- Installed and configured Linux servers across development and production environments.
- Managed users, groups, permissions, and SSH access for secure server management.
- Managed disk partitions, LVM volumes, and swap memory.
- Performed OS patching, updates, packages installation, and package management using YUM and DNF.
- Monitored system performance and resolved CPU, memory, disk, and network issues.
- Implemented Passwordless SSH authentication.
- Scheduled jobs using Cron and at commands.

Server & Networking

- Configured and managed NFS, SAMBA, SMTP, and FTP services.
- Installed, configured and maintained Apache HTTP Server for web applications.
- Managed TCP/IP networking, DNS resolution, firewall configuration, and network troubleshooting.
- Configured SSH access and secure remote administration.

AWS Cloud

- Designed VPC architecture including Subnets, route tables, and security groups.
- Configured IAM users, roles, and policies for secure access.
- Monitored infrastructure using CloudWatch.
- Managed EC2 Linux and Windows servers.
- Managed AWS storage services including S3, EBS, and EFS.
- Implemented Load Balancers and Auto Scaling for high availability.
