Vignesh S

Aspiring VAPT Professional

9524265106 vignesh.professional20@gmail.com Namakkal, Tamil Nadu Vignesh-Linkedin

Career Objective

Final-year Cybersecurity student with hands-on exposure to vulnerability assessment and penetration testing across web, mobile, network, and API environments through self-learning, labs and self-driven practice on platforms such as TryHackMe, PortSwigger and OWASP BWA (Broken Web Apps). Skilled in OWASP Top 10 concepts, common scanning and exploitation tools, and basic scripting. Seeking a Junior Vulnerability Assessment and Penetration Testing role to apply and grow these skills in a professional offensive-security team.

Skills

VAPT Domains — Web Application Testing, Mobile Application Testing (Android), Network VAPT.

Tools — Burp Suite, OWASP ZAP, sqlmap, MobSF, JADX, ADB, Frida, Objection, Nmap, Nessus, OpenVAS, Metasploit, Wireshark, Postman.

Security Standards — OWASP Top 10, OWASP Mobile Top 10, CWE, CVSS

Networking — TCP/IP, HTTP/HTTPS, DNS, Ports & Services, IP addressing, Network Enumeration and Firewalls.

Other — Report writing & vulnerability documentation

Operating Systems — Linux, Windows

Scripting — Bash Scripting

AI Security Labs — PortSwigger LLM Labs, Kontara.

Internship Experience

Quality Assurance Intern, SeeDataMD 09/2025 – 04/2026
Project: Dotzza Salem | Hybrid

- Performed **QA and security testing** on web applications, identifying functional, UX/UI, and security-related issues.
- Conducted **manual and automated vulnerability scanning** using **Burp Suite and OWASP ZAP**, identifying and validating common web application vulnerabilities.
- Documented security findings and QA issues with **clear evidence, impact, and remediation recommendations** to support application improvement.

Vulnerability Assessment & Penetration Testing – Hands-on Practice

Web Application Penetration Testing Lab

- Performed manual and automated security testing on the deliberately vulnerable **Voltmart web application** using **Burp Suite and OWASP ZAP**, identifying and validating common web application vulnerabilities.
- Identified and documented vulnerabilities including **SQLi, XSS, CSRF, IDOR, SSRF, File Upload, Authentication, Session Management**, and other common vulnerabilities.

Mobile Application Security Testing

- Conducted static and dynamic security testing of the SecureShop Android APK using MobSF, Burp Suite, ADB, and Android testing tools.
- Identified and validated mobile security vulnerabilities, documented proof of concepts, assessed risk, and provided remediation recommendations.

Network Vulnerability Assessment

- Performed network vulnerability assessment and penetration testing on the Metasploitable 2 lab environment using Nmap, Nessus, Metasploit, and enumeration techniques.
- Identified, validated, and documented network vulnerabilities with proof of concept, risk assessment, and remediation recommendations.

Hands-on Security Practice

- **Achievement** - Winner Hacker Holidays 2026: Completed all 14 cybersecurity challenges and won the challenge prize.
- **TryHackMe** - Top 5% Global Ranking – Completed hands-on cybersecurity labs.
- **PortSwigger** - 50+ Labs Completed – Practiced Business Logic, JWT, Information Disclosure, SSRF, CORS and other common vulnerabilities.
- **CyLab Security Academy -** Completed 50+ CTF challenges.
- **OffSec** – Level 5 Practiced cybersecurity labs involving enumeration, vulnerability identification, exploitation, and privilege escalation.
- **OWASP Broken Web Applications** - DVWA, bWAPP, WebGoat.NET, OrangeHRM.
- **CTF -** Skillbit, Null Origin, H7CTF26.

Certifications

- TryHackMe - Cyber Security 101 (In progress)
- TryHackMe - Pre Security
- TryHackMe - Hacker Holidays 2026
- TCM Security – Linux 100: Fundamentals

Education

Bachelor of Engineering in Computer Science and Engineering (Cyber Security), Sri Shanmugha College of Engineering and Technology 2023 – 2027
Salem, Tamil Nadu.
CGPA: 7.25
