PROFESSIONAL SUMMARY

Adedicated and forward-thinking engineering student seeking an opportunity to apply my skills in a practical environment. Eager to join an innovative team where I can enhance my expertise, solve challenging problems, and contribute to impactful projects.

EDUCATION

Bachelor of Electronics and Communication Engineering - 7.65 CGPA. 2022 - 2026
SONA COLLEGE OF TECHNOLOGY, SALEM.

Higher Secondary Education - 86 % 2020 - 2021
GOVERNMENT HIGHER SECONDARY SCHOOL SALEM.

Secondary Education - 77 % 2018 - 2019
THE GUGAI HIGHER SECONDARY SCHOOL SALEM.

TECHNICAL SKILLS

- Python
- C PROGRAMMING
- IOT & Embedded System
- SQL
- Machine Learning

SOFT SKILLS

- Time Management
- Teamwork
- Adaptability

AREA OF INTEREST

- IOT & Embedded System
- VLSI design
- Data Analyticts
- Machine Learning
- Software Devolepment

CERTIFICATIONS

- Internet of Things(IOT) NPTEL Certification
- LabVIEW Certification – DigiLoad Technology
- Workshop on Embedded Systems using Arduino Ezone Electronics.

EXTRACURRICULAR ACTIVITIES

- Participated in technical workshops and IoT projects.
- Participated in sports and cultural activities.
- Involved in team-based project development.

PROJECTS

1.DEEP LEARNING BASED AUTOMATED OCULAR DISEASE CLASSIFICATION

- Applied advanced convolutional neural networks and transfer learning to retinal imaging data. improved accuracy in early detection of disorders such as glaucoma, cataract, and diabetic retinopathy. Designed the system to assist ophthalmologists in faster and more reliable diagnosis.

2.SMART IOT GAIT MONITORING SYSTEM FOR EARLY PARKINSON'S DISEASE DIAGNOSIS USING MACHINE LEARNING

- Developed an IoT-based system to monitor human gait patterns for early detection of Parkinson’s disease. Sensors collect real-time walking data which is analyzed using Machine Learning algorithms to identify abnormal gait behavior. The system enables early diagnosis and continuous health monitoring.

3.SIMPLE CALCULATOR APPLICATIONS

- A calculator program takes two numbers as input from the user. It asks the user to choose an operation like addition ,subtraction, multiplication, or division. Based on the chosen operation, the program performs the calculator.
