CAREER OBJECTIVE

I am a B.E. Electronics and Communication Engineering student with a passion for PCB design and embedded systems. With strong technical skills, time management, and adaptability, I aim to gain practical experience and continuously learn. My goal is to contribute to innovative solutions in embedded technology and IoT while working in collaborative environments.

EDUCATION

Bachelor of Engineering, Sri Shanmugha college of engineering and technology **2022 - 2026**
Electronics and Communication Engineering - 7.1 CGPA (up to 6th semester)

HSC - Government Higher Secondary School **2021 - 2022**
Maths Computer - 65%

SKILLS

Technical Skills

- Microcontroller Interfacing
- PCB Designing (Basics)
- Canva Designing and editing

Soft Skills

- Leadership & Teamwork
- Time Management
- Attentive & Adaptability
- Communication

Computer Language

- C Programming Basics
- Adaptive C++ basics

TRAINING

- **AICTE-approved virtual internship as on Embedded System Developer by Microchip University.**
  - Gained hands-on experience in embedded system development using Microchip microcontrollers, MPLAB tools, and real-time debugging techniques.
  - Developed skills in sensor interfacing, communication protocols (UART, I2C, SPI), and low-power design for IoT applications.
- **Master Class in Internet of Things Conducted by NoviTech R&D Private Limited** **30 Days**
  - Gained Knowledge on my understanding of IoT and its impact on the future of technology

PROJECT

- **Motion based traffic controller in Metropolitan Cities using Arduino Uno** **NOV 2024**
  - The project uses Arduino Uno and motion sensors to detect the real-time density of vehicles at traffic junctions.
  - It automatically controls and adjusts traffic signal timings to prioritize lanes with heavier traffic flow.
  - This system helps reduce congestion, minimize waiting time, and improve road safety in metropolitan cities.

WORKSHOP

- **Virtual Reality & Augumented Reality Workshop - Sri shanmugha college of Engineering and Technology**
- **PCB Designing with Proteus software - Sri shanmugha college of Engineering and Technology**

CERTIFICATIONS

- **Embedded System Developer - AICTE-EduSkills**
- **Data Science & Analytics - HP LIFE**
- **Virtual Reality & Augmented Reality- SSCET**
