VANUSHA A K

CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student seeking an entry-level opportunity to apply my technical knowledge, problem-solving abilities, and project experience in a dynamic organization. Eager to learn new technologies, contribute to innovative solutions, and continuously develop my technical and professional skills while adding value to the organization.

EDUCATION

- **ELECTRONICS AND COMMUNICATION ENGINEERING**
  KnowledgeInstitute of Technology
  2023-2027 (8.3)CGPA

- **Higher Secondary Certificate**
  Sree Saravana Niketan Matric.Hr.Sec.School
  2022 - 2023 (83.5%)

- **Secondary School Leaving Certificate**
  AGN Matric Higher Secondary School
  2020-2021 (ALL PASS)

TECHNICAL SKILLS

- **Programming:** c, JAVA
- **Core Domain:** Digital Electronics, VLSI, Basic Electronics
- **Tools:** Vivado, Matlab, EDA Playground
- **Development Tools:** Visual Studio Code

CERTIFICATION

- **NPTEL** – Sensors and Actuators (Elite – 63%)
- **Presented a Paper** on “Smart Food Monitoring Using Sensors and IoT” at Bannari Amman Institute of Technology

PROJECTS

Street Light Fault Detection System

- Developed an IoT-based system to automatically detect street light failures using sensors
- Implemented real-time fault identification and alert mechanism
- Focused on improving maintenance efficiency and reducing manual inspection

Women Safety Pendant

- Built a wearable IoT device designed to enhance personal safety
- Integrated alert mechanism for emergency situations
- Designed for quick response and real-time communication

Fleet Vision – Bus Tracking & Occupancy Monitoring System

- Developed a real-time tracking system for public transport using IoT
- Monitored vehicle location and passenger occupancy
- Aimed at improving transport efficiency and passenger convenience

INTERSHIPS

WIZAARDSYSTEM(Dec 2024)

- Designed circuit schematics and PCB layouts
- Learned industry tools for hardware development

UDHGEETHTECH (Feb 2024)

- Worked with electronic components and basic circuit design
- Performed troubleshooting on simple electronic systems
